# Question 1

A common, but older alternative to the XML Schema Definition Language is: Select the correct answer.

## Options:

**A-** Hypertext Markup Language

**B-** Extensible Markup Language

**C-** Document Type Definitions

**D-** XML Data Model Definition Language

## Answer:

C

# Question 2

Which of the following statements are false? SELECT ALL THAT APPLY

## Options:

**A-** A service enters the service consumer role only when it initiates contact with other service consumers.

**B-** A service enters the service consumer role only when it accesses other services acting as intermediaries.

**C-** A service enters the service consumer role when it initiates contact with other services acting as service providers, including those also acting as intermediaries.

**D-** A service cannot enter the service consumer role.

## Answer:

A, B, D

# Question 3

**Question Type: MultipleChoice**

WS-BPEL is an XML-based language that can be used to define business process logic that can be carried out via the composition of SOAP-based Web services. Select the correct answer.

## Options:

**A-** True

**B-** False

## Answer:

A

# Question 4

**Question Type: MultipleChoice**

A WS-Policy definition can be attached to different parts of a _____ or to multiple _____. Select the correct answer.

## Options:

**A-** service activity, service activities

**B-** service contract, service contracts

**C-** service model, service models

**D-** service line, service lines

B

# Question 5

**Question Type:** **MultipleChoice**

SOAP-based Web services can be designed for use within traditional RPC-style distributed solutions or for use in service-oriented solutions. Select the correct answer.

**Options:**

**A-** True

**B-** False

**Answer:**

A

# Question 6

If Service B is invoked by Service A and then Service B invokes Service C and all of this happens as part of the same service activity, then Service B would be considered: Select the correct answer.

## Options:

**A-** an intermediary

**B-** a service agent

**C-** an ultimate receiver

**D-** an initial sender

## Answer:

A

# Question 7

WS-Addressing is most commonly associated with _____ functionality. Select the correct answer.

## Options:

**A-** process management

**B-** policy enforcement

**C-** message routing

**D-** choreography

## Answer:

C

# Question 8

**Question Type: MultipleChoice**

Identify what is wrong with the following statement: "I have a single Calculator component that provides basic math functions. I'm exposing this component as a component-based service for internal service consumers that are also component-based. I'm exposing this component as a SOAP-based Web service for internal and external service consumers that support SOAP messaging. I'm also exposing this component as a REST service for external service consumers that prefer to access its functions via HTTP methods. I'm

also exposing this component as a service agent for service consumers that support explicit invocation via a service contract." SELECT ALL THAT APPLY

## Options:

**A-** A single component cannot be exposed as a component-based service, a SOAP-based Web service and a REST service at the same time.

**B-** SOAP-based Web service consumer programs cannot be both internally and externally located.

**C-** The uniform contract required by REST services does not support the use of HTTP methods.

**D-** Service agents are event-driven and are therefore not explicitly invoked via a service contract.

## Answer:

D

# Question 9

**Question Type:** **MultipleChoice**

I would like to extend my WSDL definition to include a programmatically consumable statement that communicates that upon receiving a message the service will add an entry to an event log. Which technology should I use? Select the correct answer.

## Options:

**A-** Mashup

**B-** XSLT

**C-** REST

**D-** None of the above.

## Answer:

D
