Question 1

Question Type: MultipleChoice

You set up a new project for a team. Soon afterward, users report that a field is missing from one of their screens. You check the screen configuration in the administration panel and you see that the field should be present.

Why can't the users see the field?

Options:

- A- The changes to the screen were not published.
- B- The issue operation wasn't mapped to a screen.
- C- The field context does not include the project and/or issue type.
- D- The users don't have permission to view that field.

Answer:

D

Question 2

Question Type: MultipleChoice

You install a new Jira instance using only the default configurations. A team approaches you to set up a project with the following specifications:

- * There are four standard issue types and three sub-task issue types.
- * The first sub-task will need a new screen for the Edit operation.
- * The second sub-task will need new screens for both the Create and Edit operations.
- * Everything else should use the default configurations.

How many new Screen Schemes do you need to create?

Options:

A- 7

B- 4

C- 1

D- 3

E- 2

Answer:

B

Question 3

Question Type: MultipleChoice

Your HR project has two issue types:

* Join

* Leave

Both issue types share a field configuration, screens and the workflow.

You currently use the Due Date system field to indicate when someone actually joins or leaves.

New HR staff members complain that using the Due Date field is not very intuitive.

How can you help your HR team?

Options:

A- Create individual Join Date and Leave Date custom fields to replace the Due Date field.

Create separate screens for each issue operation and issue type.

Delete the Due Date field.

B- Rename the Due Date field to Join Date and create a separate Leave Date custom field.

Create new screens for the Leave issue type and replace the Due Date field with the newly created field.

Migrate existing field values to the new Leave Date field.

C- Create individual field contexts for each issue type.

Label the Due Date field as Join Date and Leave Date in their respective contexts.

Associate each context with its matching issue type.

D- Create individual Join Date and Leave Date custom fields to replace the Due Date field.

Appropriately migrate existing data from the Due Date field to the new custom fields.

Remove the Due Date field from all project screens.

Answer:

C

Question 4

Question Type: MultipleChoice

You have two issue types in your HR project: Hire and Fire.

Which two requirements can be met through changes only to field configurations? (Choose two.)

Options:

- A-** For the Fire issue type, the Description field should have a default value of "Termination".
- B-** For both issue types, the Employee Name custom field must be required upon creation and must never be blank.
- C-** For the Hire issue type, the field description for the Due Date field should read "First day of work".
- D-** For both issue types, the Resolution should be set once the issues are being resolved.
- E-** For both issue types, the Assignee field should be hidden when creating but not when viewing an issue.
- F-** For the Fire issue type, the default value for the Priority field should be Blocker.

Answer:

D, E

Question 5

Question Type: MultipleChoice

Beehive Bank wants to implement Jira with the following requirements:

- * Enforce the strictest possible security measures for user logins.
- * Allow external users to create their own user logins.
- * Use the Jira Internal Directory.

Which two login security options can you offer them? (Choose two.)

Options:

- A-** Set Login Mode to Secure.
- B-** Require character variety for the user name.
- C-** Require that a password is not too similar to another user's password.
- D-** Require a certain length for passwords.
- E-** Require that a password is not too similar to the user name or email address.

Answer:

A, D

Question 6

Question Type: MultipleChoice

You have been asked to take on the administration of a second Jira installation in your company.

You were given the following information about user accounts:

- * The company standard is to use Active Directory (AD) to provide user accounts.
- * There are several Active Directory systems in use by different business units.
- * The second Jira is not to be merged with your main Jira.
- * The main Jira system is connected to Active Directory for user accounts.
- * The second Jira is using internal user accounts, not Active Directory.
- * People using the second Jira are using the same login ID as they would use in Active Directory.
- * Your company would like to use Single Sign-on (SSO) but has not yet implemented it for either Jira system.

Which authentication method should you recommend?

Options:

A- Change the new Jira to use your main Jira's directory services, as that is already reading your Active

Directory services.

- B-** Set up a Crowd server to get the user lists from all internal directories and AD, and use AD directly for the password checking.
- C-** Set up a Crowd server to pull in all the AD services, and plan to migrate internal users.
- D-** Change the new Jira to link directly to the required AD servers.

Answer:

B

Question 7

Question Type: MultipleChoice

Some of your project owners would like to make their projects publicly accessible over the Internet. These projects will not require login.

You could support this by allowing read-only anonymous access to the projects.

Which two additional factors should you take into consideration when setting this up? (Choose two.)

Options:

- A- Anonymous users could see other users' names.
- B- Anonymous users could export all issues from Jira.
- C- Licensed users might accidentally comment anonymously rather than logging in first.
- D- Internet search engines could index data.
- E- Anonymous users could find a full list of all your projects.
- F- Spam bots could add comments.

Answer:

B, D

Question 8

Question Type: MultipleChoice

Your marketing company wants to evaluate Jira and purchased a 10-user license. A frequently changing group of key stakeholders -- both internal employees and external customers -- will participate in the evaluation.

If the evaluation is successful the company wants all 50 employees to start working with the tool.

You have to manage the frequently changing group of stakeholders and need to make sure only the intended users participate in the evaluation.

How should you meet these requirements?

Options:

- A-** Create and manage the users for stakeholders manually in the internal directory.
- B-** Connect Jira to your internal LDAP directory and whitelist the IPs of stakeholders.
- C-** Enable public signup and CAPTCHA but limit account creation to stakeholders.
- D-** Disable public signup and grant all project permissions to Group Anyone.

Answer:

D

Question 9

Question Type: MultipleChoice

One of the HR managers created a filter and shared the subscription with members of the hr-managers group.

The filter contains the following valid JQL query:

```
Manager = currentUser() AND Manager in membersOf("hr-managers")
```

Which issues will be included in the subscription?

Options:

- A- Only issues where the user who created the filter is listed in the Manager field.
- B- Only issues where the group hr-managers is listed in the Manager field.
- C- Only issues where the recipient of the email is listed in the Manager field.
- D- All issues where the user listed in the Manager field is a member of the hr-managers group.
- E- All issues that are assigned to any member of the hr-managers group.

Answer:

D
