Question 1

Question Type: MultipleChoice

Which of the following is NOT an EPS session management (ESM) function performed by MME?

Options:

- A- Support default bearer creation, modification, and deletion
- B- Support dedicated bearer creation, modification, and deletion
- C- Inform other network elements about subscription data changes in HSS
- D- Perform network element selection

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following regarding an EPS dedicated bearer is FALSE?

Options:

- A-** It can be a GBR bearer.
- B-** It can be a non-GBR bearer.
- C-** MME obtains the dedicated bearer QoS parameters from HSS.
- D-** MME sends the dedicated bearer QoS parameters to eNodeB.

Answer:

D

Explanation:

<https://www.sciencedirect.com/topics/computer-science/dedicated-bearer>

Question 3

Question Type: MultipleChoice

Which of the following statements regarding an EPS dedicated bearer is FALSE?

Options:

- A-** A dedicated bearer is any EPS bearer to a PDN that is already connected to the UE.
- B-** A dedicated bearer can be either a GBR or non-GBR bearer.
- C-** A dedicated bearer remains active as long as the UE is attached to EPS.
- D-** A dedicated bearer uses the same IP address that was allocated for the associated default bearer.

Answer:

B

Explanation:

Question 4

Question Type: MultipleChoice

Which of the following is NOT a benefit of S1-Flex mechanism?

Options:

- A- Minimizes MME relocation in case of UE mobility
- B- Minimizes the number of MMEs required in a network
- C- Provides MME load balancing
- D- Provides MME geographical resilience

Answer:

D

Question 5

Question Type: MultipleChoice

Which of the following statements regarding a tracking area list (TA list) is TRUE?

Options:

- A- The location of an idle UE is known by the network at an eNodeB granularity.
- B- The location of an active UE is known by the network at a TA list granularity.
- C- All the tracking areas in a TA list are served by the same MME.
- D- A tracking area list is a logical set of MMEs.

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following statements best defines S-TMSI?

Options:

- A- A permanent, unique identification of a mobile subscriber in the GSM/UMTS/EPS system.

- B-** A network that provides mobile communication services to the public.
- C-** A globally unique temporary mobile identifier used to hide the subscriber's real permanent identity.
- D-** An identifier assigned by the MME that uniquely identifies a UE within an MME pool.

Answer:

C
