# Question 1

---

**Question Type:** MultipleChoice

---

Identify two correct Restart values for parallel steps in load plans. (Choose two.)

## Options:

---

- A- Restart from new session.
- B- Restart from failure.
- C- Restart from failed children.
- D- Restart all children.

## Answer:

---

C, D

## Explanation:

---

<https://docs.oracle.com/middleware/1212/odi/ODIDG/loadplans.htm#ODIDG1409>

## Question 2

---

**Question Type:** MultipleChoice

---

Which two objects can be dragged to a Mapping? (Choose two.)

### Options:

---

- A- Variables
- B- Datastores
- C- Knowledge Modules
- D- Reusable Mappings

### Answer:

---

B, D

### Explanation:

---

<https://docs.oracle.com/middleware/1212/odi/ODIDG/mappings.htm#ODIDG1560>

## Question 3

---

### Question Type: MultipleChoice

---

You must split a model with many database tables into multiple sub-models based on their names. How must you proceed? (Choose the best answer)

#### Options:

---

- A-** Create new submodels and drag data stores individually to each submodel.
- B-** Use automatic distribution feature at the models level to automatically create the submodels and move the data stores based on their names.
- C-** Create new submodels and leverage the automatic distribution feature at the submodels level to automatically move the data stores based on their names.
- D-** Create new models, drag the data stores individually to each model and then drag the models to the parent model to create submodels.

#### Answer:

---

B

#### Explanation:

---

## Question 4

---

**Question Type:** MultipleChoice

---

Identify three capabilities of load plans. (Choose three.)

### Options:

---

- A- restart from failed tasks
- B- exception handling
- C- native support for parallelism
- D- support for Open Tools
- E- restart of an agent

### Answer:

---

A, B, C

### Explanation:

---

(<https://docs.oracle.com/middleware/1212/odi/ODIDG/loadplans.htm#ODIDG1352>) This link says "restartability" as one of options, so it can be either A or E, most likely its A

## Question 5

---

### Question Type: MultipleChoice

---

The source and target data stores are located on the same data server. Which statement is correct about the need for a Loading Knowledge Module to load the data on the target? (Choose the best answer.)

### Options:

---

- A- Only an Integration KnowledgeModule single-technology is required.
- B- Only an Integration Knowledge Module multitechnology is required.
- C- Aloading Knowledge Module multitechnology and an IntegrationKnowledgeModule single-technology are required.
- D- Both a Loading Knowledge Module multitechnology and an Integration Knowledge Module multitechnology are required.

**Answer:**

---

C

**Explanation:**

---

[http://docs.oracle.com/cd/E21764\\_01/integrate.1111/e12643/interfaces.htm#ODIDG1059](http://docs.oracle.com/cd/E21764_01/integrate.1111/e12643/interfaces.htm#ODIDG1059)

## Question 6

---

**Question Type:** MultipleChoice

---

You want to modify the code generated by a failed Task and restart the session. How must you proceed? (Choose the best answer.)

**Options:**

---

- A-** Open the Task in Operator, go to Code, click Edit, use Pre-execution Code to edit the code, and save it.
- B-** It is not possible to modify the code once it has been generated.
- C-** Open the Step in Operator, edit the code, and save it.

**D-** Open the Task in Operator, go to Code, click Query/Execution Plan to edit the code, and save it.

**Answer:**

---

D

**Explanation:**

---

<http://www.odigurus.com/2011/05/using-operator.html>

## Question 7

---

**Question Type: MultipleChoice**

---

You must monitor and manage a co-located stand-alone agent, OracleDIAgent1, by using the ODI plug-in for Enterprise Manager Cloud Control. Which is the correct command to start this agent on Linux? (Choose the best answer.)

**Options:**

---

- A- `./agent.sh --NAME=OracleDIAgent1 --PORT=20910`
- B- `./agent.sh --NAME=OracleDIAgent1`
- C- `./startComponent.sh OracleDIAgent1`
- D- `./startComponent.sh OracleDIAgent1 --PORT=20910`

**Answer:**

---

A

**Explanation:**

---

<https://community.oracle.com/thread/3780742?start=0&tstart=0>

## Question 8

---

**Question Type: MultipleChoice**

---

You are designing a load plan in which you must create multiple branches based on the value of a variable. How do you accomplish this by using Load Plan Editor? (Choose the best answer.)

### Options:

---

- A- Add a case step and drag the variable into the case step.
- B- Create a scenario from the variable and add the scenario to the load plan to create a case step.
- C- Add a case step in the load plan and select a variable in the wizard.
- D- Drag the variable into the load plan and define a case step.

### Answer:

---

A

### Explanation:

---

<https://docs.oracle.com/middleware/1213/odi/develop/loadplans.htm#ODIDG1356>

## Question 9

---

**Question Type: MultipleChoice**

---

You need to reverse engineer a flat file that contains multiple record formats. How must you proceed? (Choose the best answer.)

### Options:

---

- A-** Create a Data Server by using the File technology and specify the various record formats while reverse engineering the file.
- B-** Create a Data Server by using the XML technology, create an XSD file by using the Native Format Builder, and then reverse engineer it in a Model.
- C-** Create a Data Server by using the File technology, create an XSD file by using the Native Format Builder, and then reverse engineer it in a Model.
- D-** Create a Data Server by using the Complex File technology, create an XSD file by using the Native Format Builder, and then reverse engineer it in a Model.

### Answer:

---

D

### Explanation:

---

[https://blogs.oracle.com/dataintegration/entry/oracle\\_data\\_integrator\\_11\\_1](https://blogs.oracle.com/dataintegration/entry/oracle_data_integrator_11_1)

## Question 10

---

**Question Type:** MultipleChoice

---

Which are the two correct statements about Work repositories? (Choose two.)

**Options:**

---

- A- They contain project and security information.
- B- They contain data models and execution information.
- C- They contain data and security information.
- D- They contain data models and project information.

**Answer:**

---

D

**Explanation:**

---

[https://docs.oracle.com/middleware/1212/odi/ODIDG/admin\\_reps.htm#ODIDG155](https://docs.oracle.com/middleware/1212/odi/ODIDG/admin_reps.htm#ODIDG155)

## Question 11

---

**Question Type:** MultipleChoice

---

Identify the name of the default WebLogic data source created for the Master Repository when setting up a JEE domain. (Choose the best answer.)

**Options:**

---

- A- odiMasterRepository
- B- MasterRepository
- C- odimasterrepository
- D- ODIMasterRepository

**Answer:**

---

A

**Explanation:**

---

[https://docs.oracle.com/cd/E23943\\_01/install.1111/e16453/configure.htm#ODING303](https://docs.oracle.com/cd/E23943_01/install.1111/e16453/configure.htm#ODING303)

## Question 12

---

**Question Type: MultipleChoice**

---

You are defining a data store in ODI metadata and want to add a primary key even if it does not physically exist on the related database catalog.

How can you accomplish this? (Choose the best answer.)

**Options:**

---

- A-** You can add a primary key even if it does not physically exist on the related database catalog, by adding constraintson the data store.
- B-** You can add a primary key even if it does not physically exist on the related database catalog, by adding constraints to the data store diagram.
- C-** You cannot add a primary key if it does not physically exist on the related database catalog. You can flag only non-null conditions to be checked.
- D-** You cannot add a primary key if it does not physically exist on therelated database catalog. You can reverse engineer only the existing constraints.

**Answer:**

---

D

**Explanation:**

---

(<https://docs.oracle.com/middleware/1212/odi/ODIKM/teradata.htm#ODIKM1061>)
