Answer:

C, D

Question 6

Question Type: **MultipleChoice**

What component of the Symantec Management Platform defines all the information that a Symantec Management Agent would require in order to establish a connection to a Notification Server or Site Server?

Options:

A- Certificate Roll-Out

B- Communication Profile

C- Credentials Profile

D- Automation Rule

Answer:

B

Question 7

Question Type: **MultipleChoice**

A company has an environment where only some computers have the Symantec Workspace Virtualization (SWV) agent installed.

What happens to computers without the SWV Agent when an administrator distributes an MSI application through a Managed Delivery policy to all company computers and installs the application into a virtual layer?

Options:

A- The application installation fails

B- The application is installed as non-virtual, but the application is moved into a virtual layer after the SWV agent is installed

C- The SWV agent is automatically installed; then the application is installed into a virtual layer

D- The application is installed as non-virtual

Answer:

D
