Question 1

Question Type: MultipleChoice

How does the ProxySG handle a rule that contains a syntax error when the ProxySG processes installed policy as part of a client transaction? (Choose the best answer.)

Options:

- A- The ProxySG changes the transaction status to Deny and makes an entry in the event log
- B- The ProxySG stops processing of the layer containing the rule and continues with the next layer, if any
- C- This is NOT possible; rules with syntax errors are unable to be installed.
- D- The ProxySG skips the rule and does NOT change the accept or deny status of the transaction

Answer:

A

Question 2

Question Type: MultipleChoice

Which two (2) errors are the most common certificate errors? (Choose two.)

Options:

- A- The server does NOT recognize the ProxySG.
- B- The client does NOT trust the server.
- C- The client does NOT trust the ProxySG.
- D- The ProxySG does NOT trust the server.
- E- The server does NOT trust the client.

Answer:

C, D

Question 3

Question Type: MultipleChoice

Which log format is associated with the main log facility by default? (Choose the best answer.)

Options:

A- http

B- elff

C- main

D- bcreportermain_v1

Answer:

D

Question 4

Question Type: MultipleChoice

What should an administrator utilize in policies to specify which traffic should be decrypted? (Choose the best answer.)

Options:

A- Listeners

- B- URL categories
- C- The SSL Proxy
- D- All proxy services

Answer:

A

Question 5

Question Type: MultipleChoice

Which two (2) locations is the WebFilter database stored in? (Choose two.)

Options:

- A- At several data centers around the world
- B- In the WebPulse data cache
- C- On clients' mobile devices
- D- On a properly licensed ProxySG

E- Symantec Management Center

Answer:

A, D

Question 6

Question Type: MultipleChoice

Which service setting determines whether the traffic is passed to the SSL proxy or the HTTP proxy when a browser is configured to use an explicit proxy connection to the ProxySG? (Choose the best answer.)

Options:

- A- Enable SSL/TLS
- B- Detect protocol
- C- Authenticate-401
- D- Forward client cert

Answer:

B

Question 7

Question Type: MultipleChoice

In which caching technique does the ProxySG open multiple server connections to retrieve objects referenced on a web page before the client actually issues the requests for those objects? (Choose the best answer.)

Options:

- A- Popularity contest
- B- Cost-based deletion
- C- Asynchronous adaptive refresh
- D- Pipelining

Answer:

D

Question 8

Question Type: MultipleChoice

How does an administrator create a single group in policy that includes multiple client addresses? (Choose the best answer.)

Options:

- A- Create a combined policy object.
- B- Include the addresses in a layer guard.
- C- This can only be done using CPL.
- D- Use a dedicated layer.

Answer:

A

Question 9

Question Type: MultipleChoice

What is typically the biggest load on a CPU when managing encrypted traffic? (Choose the best answer.)

Options:

- A- Emulating certificates
- B- Using the SHA-2 hash function
- C- Using RSA encryption
- D- The need for redirection

Answer:

A

Question 10

Question Type: MultipleChoice

What is the default TCP port for HTTP? (Choose the best answer.)

Options:

A- 20

B- 443

C- 80

D- 43

Answer:

C
