Question 1

Question Type: MultipleChoice

You are in the process of setting up your organization's Resources and learn that Resources in France will be working a 35-hour work week.

What will you need to do to set them up with the proper work calendar?

Options:

- A-** As PSA only allows one work calendar, it is best to implement a 40-hour work calendar and then create a validation rule to only allow 35 hours a week.
- B-** As the Work Calendar mostly impacts Utilization, set them up with a 40-work calendar, and then include the 35-hour hour work week in your utilization calculations.
- C-** Create a separate 35-hour work calendar and associate it to the French Resources, including any specific French Holidays.

Answer:

C

Question 2

Question Type: MultipleChoice

An Administrator can find the majority of settings for PSA in which two of the following areas? (Choose two.)

Options:

A- Configuration Groups

B- Custom Settings

C- PSA Administration Page

Answer:

A, C

Question 3

Question Type: MultipleChoice

Your company's leadership noticed that the "PSA Resourcing" Lightning Component is displaying a "Default Cost Rate" column. They asked you to remove this column from the component. You edited the Resource Request Lightning Page, selected the "PSA Resourcing" component, and identified the "Column Field Set" setting.

What is the next step to complete this change?

Options:

- A-** Go to Setup > navigate to the Object Manager for 'Contact' > select Field Sets > remove the 'Default Cost Rate' field from the field set
- B-** Go to Setup > navigate to Custom Settings > open the 'Resource Request' setting > populate the Field Set in the 'Resource Grid Field Set'
- C-** Go to Setup > navigate to the 'PSA User' Permission Set > open the 'Resource Request' object settings > remove field level security for the 'Default Cost Rate' field

Answer:

A

Question 4

Question Type: MultipleChoice

Your current setup of utilization automatically subtracts PSA Holidays from the total number of hours defined in a resource's "Work Calendar." How can utilization be configured so Holidays are not automatically subtracted?

Options:

- A-** Go to App Launcher > navigate to 'PSA Administration' > select 'Schedule Utilization' > Navigate to the Information section > set 'subtract holidays from total hours' to false
- B-** Go to Ag Launcher > navigate to 'Configuration Groups' > select 'Utilization' > select 'subtract holidays from total hours' > set to false
- C-** Go to Ag Launcher > navigate to 'Utilization Calculation' > select the calculation you want modified > set 'subtract holidays from total hours' to false

Answer:

C

Question 5

Question Type: MultipleChoice

Which of the following custom settings can be specific to a User?

Options:

- A-** Search Resources Global

B- Timecard Entry UI Personal

C- Assignment Settings

Answer:

B

Question 6

Question Type: MultipleChoice

You are notified that some approved Miscellaneous Adjustments records are not getting picked up in the Billing Event Generation process during month end billing.

Which two of the following system settings do you need to have in place for Miscellaneous Adjustments to get picked up in the billing run? (Choose two.)

Options:

A- The Effective Date value on the Miscellaneous Adjustments records is within the Date range of the Time period used on the Billing Generation process.

B- The person running the Billing Event Generation process does not have Billing Miscellaneous Adjustments permission control for the

Region, Account, or Project selected on the Billing Generation process.

C- The Transaction Category value on the Miscellaneous Adjustments record exists in the Configuration option: BillingCategories.

Answer:

A, C
