Question Type: MultipleChoice

DevOps incorporates Lean Production principles in software development.

What Lean principle is the core of DevOps?

Options:

- A- Continuous delivery
- B- Self-organization
- C- Value chain thinking
- D- Welcoming change

Answer:

A

Question 2

Question Type: MultipleChoice

What is a benefit of the way the Definition of Done is defined in DevOps?

Options:

- A- The team focuses less on the "what" and more on "when"
- B- The team focuses less on the "what and more" on "where"
- C- The team focuses less on the "what" and more on "who"
- D- The team focuses less on the "what" and more on "why"

Answer:

A

Question 3

Question Type: MultipleChoice

A company is not yet using DevOps practices. The team notices a problematic accumulation of technical debt.

One of the team members suggests implementing DevOps practices to solve this problem.

Which DevOps practices support reducing technical debt?

Options:

- A-** Constant refactoring and eliminating previous bottlenecks
- B-** Continuous delivery and promoting pair programming
- C-** Continuous feedback and implementing a deployment pipeline

Answer:

A

Question 4

Question Type: MultipleChoice

Every team needs information. In DevOps, it is stressed to visualize certain information.

Which piece of information should be made available, so the team has ready access to it?

Options:

- A- In which step is work accumulating, inhibiting flow?
- B- What is management working on right now?
- C- Which other projects do not have enough manpower?

Answer:

A

Question 5

Question Type: MultipleChoice

For what type of business is DevOps the least suitable?

Options:

- A- Companies with unacceptable IT-related risks for the core business
- B- Companies without in-house software development
- C- Small companies or start-ups

Answer:

B

Question 6

Question Type: MultipleChoice

A team stores not only source code, but many other things related to the IT system, such as tests, scripts, artifacts, libraries and many other things.

Which DevOps principle has this team implemented?

Options:

A- Continuous delivery

B- Deployment pipeline

C- Version control

Answer:

C

Question 7

Question Type: MultipleChoice

In DevOps, the organization should start where they are and progress iteratively.

What needs to change compared to a more traditional environment to facilitate progression?

Options:

- A- Cultural and organizational changes within the IT department only
- B- Disappearance of the Development and Operations departments
- C- Implementation of complex systems, to ensure confidence in the systems
- D- Management principles and approaches to information technology

Answer:

D

Question 8

Question Type: MultipleChoice

DevOps implies that not only the boundary between Development and Operations must disappear.

Which other boundary must also disappear?

Options:

- A-** The boundary between Development and marketing
- B-** The boundary between IT management and the rest of the IT department
- C-** The boundary between the finance department and Development
- D-** The boundary between the HR department and Operations
- E-** The boundary between the IT department and the business

Answer:

A

Question 9

Question Type: MultipleChoice

Commercial off-the-shelf software (COTS) has both advantages and limitations for businesses.

What is true about COTS?

Options:

- A-** COTS supports continuous development with its fast implementation
- B-** COTS will save the business time and money, by reducing development time
- C-** Depending on the type of COTS used, the possibility of customization is limited

Answer:

B

Explanation:
