Question 1

Question Type: MultipleChoice

Refer to the exhibit.

If the signal is set to -68 dB on the FortiPlanner site survey reading, which statement is correct regarding the coverage area?

Options:

- A- Areas with the signal strength equal to -68 dB are zoomed in to provide better visibility
- B- Areas with the signal strength weaker than -68 dB are cut out of the map
- C- Areas with the signal strength equal or stronger than -68 dB are highlighted in multicolor
- D- Areas with the signal strength weaker than -68 dB are highlighted in orange and red to indicate that no signal was propagated by the APs.

Answer:

D

Question 2

Question Type: MultipleChoice

Six APs are located in a remotely based branch office and are managed by a centrally hosted FortiGate. Multiple wireless users frequently connect and roam between the APs in the remote office.

The network they connect to, is secured with WPA2-PSK. As currently configured, the WAN connection between the branch office and the centrally hosted FortiGate is unreliable.

Which configuration would enable the most reliable wireless connectivity for the remote clients?

Options:

- A- Configure a tunnel mode wireless network and enable split tunneling to the local network
- B- Configure a bridge mode wireless network and enable the Local standalone configuration option
- C- Configure a bridge mode wireless network and enable the Local authentication configuration option
- D- Install supported FortiAP and configure a bridge mode wireless network

Answer:

A

Question 3

Question Type: MultipleChoice

When using FortiPresence as a captive portal, which two types of public authentication services can be used to access guest Wi-Fi?
(Choose two.)

Options:

- A- Social networks authentication
- B- Software security token authentication
- C- Short message service authentication
- D- Hardware security token authentication

Answer:

A, C

Question 4

Question Type: MultipleChoice

Refer to the exhibit.

What does the asterisk (*) symbol beside the channel mean?

Options:

- A-** Indicates channels that can be used only when Radio Resource Provisioning is enabled
- B-** Indicates channels that cannot be used because of regulatory channel restrictions
- C-** Indicates channels that will be scanned by the Wireless Intrusion Detection System (WIDS)
- D-** Indicates channels that are subject to dynamic frequency selection (DFS) regulations

Answer:

D

Question 5

Question Type: MultipleChoice

As standard best practice, which configuration should be performed before configuring FortiAPs using a FortiGate wireless controller?

Options:

- A- Create wireless LAN specific policies
- B- Preauthorize APs
- C- Create a custom AP profile
- D- Set the wireless controller country setting

Answer:

D

Question 6

Question Type: MultipleChoice

What type of design model does FortiPlanner use in wireless design project?

Options:

- A- Architectural model
- B- Predictive model
- C- Analytical model

D- Integration model

Answer:

B
