## Question 1

---

**Question Type:** MultipleChoice

---

According to UiPath's best practices, when should the test scenarios and test cases be created?

### Options:

---

- A- During the Test RPA phase
- B- When preparing the test data
- C- During the Solution Design phase
- D- During the Prepare RPA phase

### Answer:

---

C

## Question 2

---

**Question Type:** MultipleChoice

---

What is the recommended way to extract data from an Invoice?

**Options:**

---

- A- Using the ML Extractor with the Invoices out-of-the-box ML model
- B- Using the Form Extractor
- C- Using FormsAI
- D- Using the RegEx extractor

**Answer:**

---

A

## Question 3

---

**Question Type: MultipleChoice**

---

What is same-screen detection for actions recorded in an UiPath Task Capture diagram?

### Options:

---

- A-** After finishing the capture process. Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The merge is automatic, thus making the process fast and efficient
- B-** After finishing the capture process. Task Capture offers to detect actions per all documents that contain similar screenshots and also offers to merge them. The actions can also be manually reviewed prior to merging
- C-** During the capture process Task Capture automatically detects actions that contain similar screenshots and also merges them
- D-** Prior to starting the capture process, Task Capture analyzes the applications used and groups them by similarity of appearance, so that during the recording the screenshots will be automatically grouped

### Answer:

---

B

## Question 4

---

**Question Type:** MultipleChoice

---

Which type of automation is most commonly used in Customer Service or Customer Support processes?

### Options:

---

- A- UI automation
- B- Attended automation
- C- Desktop automation
- D- Unattended automation

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

Which of the following best describes the differences between an "as is" process map and a "to be" process map in the context of RPA (Robotic Process Automation)?

**Options:**

---

- A- An 'as is' process map is used for manual processes, while a 'to be' process map is used for automated processes
- B- An 'as is' process map shows the steps in a process, while a 'to be' process map shows the inputs and outputs for each step

**C-** An 'as is' process map is used for data analysis, while a 'to be' process map is used for process optimization

**D-** An 'as is' process map shows the current state of a process, while a 'to be' process map shows the desired future state of the process

**Answer:**

---

D

## Question 6

---

**Question Type: MultipleChoice**

---

What is the purpose of creating an AS IS process map during the business analysis phase for RPA?

**Options:**

---

**A-** To evaluate the feasibility of the automation solution

**B-** To understand the current state of the business process

**C-** To identify potential automation opportunities

**D-** To design the automation solution

**Answer:**

---

B

## Question 7

---

**Question Type: MultipleChoice**

---

What event can affect selector reliability in automations?

**Options:**

---

- A-** An update to the UiPath Robot running the automation
- B-** Automation target applications being updated
- C-** Target applications changing their position on the screen
- D-** An increase in the volume of transactions

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

What does a Business Logic Translation Table do?

### Options:

---

- A- Capture every action performed by the SME on the application layer
- B- List the business rules and use them as reference in the As-Is process description
- C- Capture short video recordings
- D- Process activities detailed at key stroke level with respective screen shots captured

### Answer:

---

B

## Question 9

---

**Question Type:** MultipleChoice

---

What are 2 key features of UiPath Automation Hub?

**Options:**

---

- A- Process Identification, Command Line Interface
- B- Process & Documentation Bank, App creation for process discovery
- C- Integration with Task Capture. Process Graph Visualization
- D- Pipeline Management. Process & Documentation Bank"

**Answer:**

---

D

## Question 10

---

**Question Type: MultipleChoice**

---

How can a Business Analyst measure the success of an automation implementation using UiPath?

**Options:**

---

- A- By tracking the number of errors and exceptions that occur during the execution of the automation process
- B- By tracking the level of customer satisfaction and business value generated by the automation process
- C- By tracking the accuracy and completeness of the automation process compared to manual execution
- D- By tracking the total amount of time the automation process has been executed

**Answer:**

---

B

## Question 11

---

**Question Type: MultipleChoice**

---

Which of the following are structured documents that can be processed with Document Understanding?

**Options:**

---

- A- forms, passports and ID cards

**B-** forms, passports, ID cards, contracts and emails

**C-** passports, invoices, purchase orders, utility bills

**D-** contracts, emails and health records

**Answer:**

---

A

## Question 12

---

**Question Type:** MultipleChoice

---

Who should be involved in the UAT phase?

**Options:**

---

**A-** Process Owner, RPA Developer, Business Analyst and Support Team

**B-** Business Analyst, Process Owner, and Subject Matter Expert

**C-** RPA Developer, Solution Architect, and Client Business Team

**D-** Support Team, Solution Architect, Business Analyst and Process Owner

**Answer:**

---

B
