Question 1

Question Type: MultipleChoice

Marion has been hired by a small business to determine why its Web site does not attract users. As Marion interviews different members of the company, she learns that when the site was first created, the external Web developer did not produce any documents specifying the basic requirements for the site. As a result, the site did not have a defined purpose and was not designed for the company's audience. Additionally, the site navigation did not make sense from a users point of view. Marion considers this information, then she recommends that the company create which document?

Options:

A- Wireframe

B- Storyboard

C- Marketing slideshow

D- Non-disclosure agreement

Answer:

B

Question 4

Question Type: **MultipleChoice**

Matthew has embedded a video in his Web page using the HTML5 video format. The video is not rendering properly. He asks Arlene to help determine the problem, so she reviews his code, which appears as follows:

```
<video height="210" class="center" controls="controls">
<video src="video.ogg" type="video/ogg" />
Your browser does not support the HTML5 video element.
</video>
```

What is wrong with this code?

Options:

A- The ogg video format is not supported by HTML5.

B- One of the video tag instances has not been properly closed.

C- The browser plug-in information required to view the video is missing.

D- The second instance of the <video> element should be replaced with the <source> element.

Answer:

D
