Options:

- A- inasm_admin
- B- inasm_editor
- C- inasm_developer
- D- inasm_operator

Answer:

D

Question 2

Question Type: MultipleChoice

Digital signatures provide authenticity and integrity for Cloud Pak for Watson AIOps container images. Which two tools can be used to verify their signatures?

Options:

A- OpenVerify

B- skopeo

C- SSH

D- OpenSSL

E- kubelet

Answer:

B, D

Explanation:

<https://www.ibm.com/docs/en/cloud-paks/cp-integration/2021.3?topic=images-verifying-image-signatures>

Question 3

Question Type: MultipleChoice

What is the key advantage of having the Impact component of Event Manager in a clustered set up?

Options:

- A- It is the easiest architecture to configure.
- B- It provides the highest level of robustness and distributes the workload evenly.
- C- It provides an out-of-the box integration into all components of Cloud Pak for Watson AIOps.
- D- It eliminates the problem with manual failover and failback.

Answer:

B

Question 4

Question Type: MultipleChoice

An existing Netcool customer is using three ObjectServer pairs in a Geo-redundant, 3-tier architecture. If they want to use the new cloud-native components of Event Manager, to which layer should those be connected?

Options:

- A- Virtual
- B- Aggregation
- C- Collection
- D- Visualization

Answer:

A

Question 5

Question Type: MultipleChoice

What is the main purpose of Secure Tunnel for ChatOps in AI Manager?

Options:

- A- To enrich ChatOps stories, which might have infrastructure artifacts, from exposure to the Internet
- B- To expose AI Manager for secure two-way communication with the ChatOps tool
- C- To protect the location and blast radius information in the ChatOps tool sent from AI Manager
- D- To secure communication between servers where ChatOps applications run

Answer:

A

Question 6

Question Type: MultipleChoice

What are two valid refresh intervals for topology view auto-updates to search for and include new changes?

Options:

- A- 10 minutes

- B-** 1 minutes
- C-** 5 seconds
- D-** 2 minutes
- E-** 30 seconds

Answer:

B, C

Question 7

Question Type: MultipleChoice

Where is the Metric Manager data aggregation interval set?

Options:

- A-** In the GUI per topic
- B-** In the GUI per data stream
- C-** In the administrative CLI per topic

D- In the admin-cli per data stream

Answer:

B

Question 8

Question Type: MultipleChoice

Which channel(s) must be configured for AI Manager to display insights in ChatOps?

Options:

A- A Message Queuing Telemetry Transport (MQTT) channel

B- A proactive and a reactive channel

C- A Message Queue (MQ) channel

D- A Java Message Service (JMS) channel

Answer:

D

Question 9

Question Type: MultipleChoice

Which statement is true about the Cloud Native Event Analytics (CNEA) component of Event Manager?

Options:

- A-** It runs entirely on RedHat OpenShift, but only within the customer's data center.
- B-** It runs entirely on a public cloud.
- C-** It runs entirely on RedHat OpenShift.
- D-** It runs entirely on RedHat OpenShift, but only on a public cloud.

Answer:

D
