Question 1

Question Type: MultipleChoice

What term describes the ability of a system to continue functioning, even when a few of its components fail?

Options:

A- Checkpointing

B- Disaster recovery

C- Fault tolerance

D- Replication

Answer:

C

Question 2

Question Type: MultipleChoice

What describes network-attached storage (NAS)?

Options:

- A- File storage that stores data in the form of objects based on the content and other attributes of the data
- B- Dedicated file server that maintains the mapping between the object IDs and the file system namespace
- C- Storage system used for creation and assignment of block storage volumes to compute systems
- D- High-performance file server that either has integrated storage or is connected to external storage

Answer:

D

Question 3

Question Type: MultipleChoice

A cloud provider installs a virtual firewall on a hypervisor to reduce the scope of a security breach when there is already a network-based firewall deployed in the cloud environment.

Which strategy did the cloud provider use to mitigate the risk of security threats?

Options:

- A- Trusted computing base
- B- Information assurance framework
- C- Adaptive security
- D- Defense-in-depth

Answer:

D

Question 4

Question Type: MultipleChoice

Identify the bare-metal hypervisors?

Options:

A- Solaris Zones and VMware Workstation

B- ESXI and Hyper-V

C- ESXI and VMware Fusion

D- Oracle Virtual Box and Hyper-V

Answer:

A

Question 5

Question Type: MultipleChoice

Which plane in a software-defined storage environment manages and provisions storage?

Options:

A- control

B- Data

C- Application

D- Service

Answer:

A

Question 6

Question Type: MultipleChoice

Which phase of the cloud service lifecycle involves ongoing management activities to maintain cloud infrastructure and deployed services?

Options:

A- Service Planning

B- Service Creation

C- Service Operation

D- Service Termination

Answer:

C

Question 7

Question Type: MultipleChoice

What workflow software enables automation of complex IT tasks?

Options:

A- Dell EMC ScaleIO

B- VMware vRealize Orchestrator

C- VMware HA

D- Dell EMC XtremIO

Answer:

B

Question 8

Question Type: MultipleChoice

Which type of attack can be controlled by imposing restrictions and limiting on-network resource consumption?

Options:

- A- Advanced persistent threat
- B- Phishing
- C- Side-channel
- D- Distributed denial of service

Answer:

D

Question 9

Question Type: MultipleChoice

What is an advantage of asynchronous remote replication?

Options:

- A- Ensures source LUN and replica have identical data at all times
- B- Supports replication across any geographic location without impacting response time
- C- Provides a near zero recovery point objective without impacting response time
- D- Requires less storage space for the replica than the source LUN

Answer:

B

Question 10

Question Type: MultipleChoice

How is application functionality segmented when using a microservices approach in an application development environment?

Options:

- A- Dependent and tightly coupled services
- B- Independent and tightly coupled services
- C- Dependent and loosely coupled services
- D- Independent and loosely coupled services

Answer:

D
