Question 1

Question Type: MultipleChoice

Which of the following is NOT a statement of value from the Agile Manifesto?

Options:

- A- Working software over comprehensive documentation
- B- Processes and tools over individuals and interactions.
- C- Responding to change over following a plan.
- D- Customer collaboration over contract negotiation.

Answer:

B

Question 2

Question Type: MultipleChoice

You are working in a team preparing a bank loan application. Your task is the preparation of acceptance tests for the following user story:

"IF a customer needs a loan for less than 50,000 Euros and they have made repayments regularly (without any delay) and the customer's monthly income is more than 3000 Euros for the last year, THEN the bank will accept the loan request; in other cases, the bank will not accept the request. A customer assistant is responsible for preparing data for approval but the approval is done by the bank manager."

Which of the following test cases can be treated as acceptance test criteria for the above user story?

- 1) As a customer assistant I can log in to the system and check the history of the customer account for the last year.
- 2) As a customer assistant I can log in to the system and check the history of the customer debts and repayments.
- 3) As a customer assistant I can log in to the system and change my password.
- 4) As a bank manager I can log in to the system and receive the information of all requests waiting for approval.
- 5) As a bank manager I can log in to the system and decide whether to approve a loan for a customer.
- 6) As a bank manager I can log in to the system within 10 seconds.

Options:

A- Acceptance test criteria are 1, 2, 3 and 6

B- Acceptance test criteria are 1, 3, 4 and 5

C- Acceptance test criteria are 2, 4, 5 and 6

D- Acceptance test criteria are 1, 2, 4 and 5

Answer:

D

Question 3

Question Type: MultipleChoice

What is the main benefit of the Test Pyramid?

Options:

A- It means testing is involved early in the development cycle.

B- It helps in evaluating the amount of test cases needed.

C- It shows complexity of testing activities.

D- It acts as a metric for testing progress.

Answer:

D

Question 4

Question Type: MultipleChoice

In a sprint planning, the product owner presents a user story written on a card. The team starts having a discussion with the product owner to get an understanding on how the software should work.

The user story written on the card is:

"As a customer, I want to subscribe to the mailing list so that I can receive the latest deal in an email."

By applying the 3C concept, which ONE of the following statements is CORRECT?

Options:

- A-** Conversation should include the acceptance criteria discussion.
- B-** The card should contain requirements not the user story.
- C-** Product owner has written a user story and confirmation is not needed.

D- The conversation is not required and the team should start developing.

Answer:

A

Question 5

Question Type: MultipleChoice

Which of the following statements about Agile retrospectives is CORRECT?

Options:

A- During Agile retrospectives, testers should be encouraged to provide constructive suggestions only on non-testing activities.

B- In an Agile retrospective the moderator can encourage and make sure that good practices are kept by the team, by asking what the team is doing well.

C- Agile retrospectives should be focused mainly on impediments that are outside the control of the team because these issues are more challenging.

D- Unlike working sessions or meetings held in non-Agile projects, Agile retrospectives do not require follow-up activities.

Answer:

B

Question 6

Question Type: MultipleChoice

Which of the following sentences about the integration of development and testing activities in Agile projects is INCORRECT?

Options:

- A-** While developers develop automated unit test scripts, testers write automated system level tests.
- B-** Testers replace developers in writing unit test automation scripts.
- C-** Developers write acceptance criteria and test cases, together with testers.
- D-** Developers and testers may work as a pair to develop and test a feature.

Answer:

B

Question 7

Question Type: MultipleChoice

Which of the following describes the main purpose of a task management tool in agile projects?

Options:

- A-** A task management tool is used by team members to share ideas and collaborate on assigned tasks.
- B-** A task management tool is used to manage and track user stories, tests and other tasks.
- C-** A task management tool is used to store source code and automated tests.
- D-** A task management tool allows developers to continuously integrate their code.

Answer:

B

Question 8

Question Type: MultipleChoice

User Story: As a user I want to be able to calculate tax percentage based on amount of income.

What is the best black box test design technique for verifying the accuracy of this user story?

Options:

- A- Statement testing - test all statements in income calculation.
- B- User story testing - test that the user can enter an income amount and get a result.
- C- State transition testing - test all states of income entry.
- D- Equivalence partitioning - test with low, medium and high income.

Answer:

D

Question 9

Question Type: MultipleChoice

Which tasks are typically performed by a tester on an Agile project?

- 1) Implementing test strategy.
- 2) Documenting business requirements.
- 3) Measuring and reporting test coverage.
- 4) Coaching development team in relevant aspects of testing.
- 5) Executing test-driven development tests.

Options:

A- 2, 5

B- 2, 4, 5

C- 1, 3, 4

D- 1, 3

Answer:

B
