Answer:

C, D

Question 3

Question Type: **MultipleChoice**

An application, created by MyCo, has a number of rules implemented as decision tables that use "Title" as an input as seen in the sample rule below:

MyCo is finding a number of application defects caused by incorrect spellings in the title field. The valid titles are stored as field values. MyCo is requesting options to help prevent these types of errors. Which of the following approaches is most applicable? (Choose One)

Options:

A- Recreate the logic in decision trees and use function aliases to limit the options via a drop down box

B- Use the table edit of the .Title property to reference the field values, the decision table will then automatically validate that the value is valid

C- Create a custom rule form that uses harnesses and sections and can be configured however MyCo desires

D- Create a custom validation rule in the Rule-Declare-DecisionTable class to validate that the .Title property always has a valid value

Answer:

B

Question 4

Question Type: MultipleChoice

Your team is developing a Quoting application for BigCo. The team is developing a Policy Administration application. The Quoting application is built on the Policy Administration application. The Policy Administration application requires enhancements to support

other areas of the business. These enhancement take place during the same time frame as the Quoting application development.

Select the two practices for your team to follow to minimize potential development conflicts. (Choose Two.)

Options:

A- Share rule sets between both application

B- Switch application when modifying rules.

C- Perform branch reviews when merging branches.

D- Periodically rebase the policy Administrator application
Answer:

B, C

Question 5

You are working with BigCo to create an application for insurance quoting. BigCo is a multinational corporation that has traded on the NASDAQ as BCO. BigCo headquarters is located in the UK, and the company has division for each geographical location.

You expect the application to contain two types of work: Quote and Policy.

The Quote guides the sales preventative through one or more quote with the customer. Each quote must be retained by the system and visible to the sales representative and the manager, any data captured during the quoting process must be available to the Policy case. The Policy represents the accepted insurance quote.

For the next year, BigCo intends to use the insurance quoting application only for the personal insurance business in the United Kingdom, Joe the business experts (SMEs) to understand the quoting process. Joe uses Pega Express to develop the quoting application with the SMEs.

Default application settings are shown in the image.

What two edits do you make to the advanced configuration based on information in the reading passage? (Choose Two).

Options:

A- Deselect "Create demonstration users".

B- Edit the Organization name to BCO."

C- Edit the Organization name to UK"

D- Edit the Division name to "UK".

**E-** Select "Framework" as the application structure.

Answer:
