Options:

- A- User and objects databases
- B- Network databases
- C- SmartConsole databases
- D- User databases

Answer:

A

Explanation:

A policy package is a collection of different types of policies. After installation, the Security Gateway enforces all the policies in the package. A policy package can have one or more of these policy types:

The installation process:

If there are verification errors, the policy is not installed. If there are verification warnings (for example, if anti-spoofing is not enabled for a Security Gateway with multiple interfaces), the policy package is installed with a warning.

Question 5

Question Type: MultipleChoice

One of major features in R80 SmartConsole is concurrent administration. Which of the following is NOT possible considering that AdminA, AdminB, and AdminC are editing the same Security Policy?

Options:

- A-** A lock icon shows that a rule or an object is locked and will be available.
- B-** AdminA and AdminB are editing the same rule at the same time.
- C-** A lock icon next to a rule informs that any Administrator is working on this particular rule.
- D-** AdminA, AdminB and AdminC are editing three different rules at the same time.

Answer:

C

Explanation:

In SmartConsole, administrators work with sessions. A session is created each time an administrator logs into SmartConsole. Changes made in the session are saved automatically. These changes are private and available only to the administrator. To avoid configuration conflicts, other administrators see a lock icon on objects and rules that are being edited in other sessions
