## Question 1

---

**Question Type:** MultipleChoice

---

What is the function of an RP in a PIM-SM network?

### Options:

---

- A- to provide routing to the PIM leaf routers
- B- to track sources and recovers on the shared distribution tree
- C- to automate the distribution of group-to rendezvous point mappings
- D- to connect multicast sources with receivers

### Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

Refer to the exhibit.

```
Router#show running-config | section line vty
line vty 0 4
 login local
line vty 5 15
 login local
|
Router#show running-config | include username
username cisco secret 5 $1$ScM67$V7NqK0g2BGit77x88U1/00
```

Refer to the exhibit. Which action automatically enables privilege exec mode when logging in via SSH?

**Options:**

---

- A-** Configure user 'Cisco' with privilege level 15.
- B-** Configure a password under the line configuration.
- C-** Configure privilege level 15 under the line configuration.
- D-** Configure the enable secret to be the same as the secret for user 'Cisco\*.

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

Which capability does a distributed virtual switch have?

### Options:

---

- A- use advanced IPsec encryption algorithms
- B- use floating static routes
- C- provide configuration consistency across the hosts
- D- run dynamic routing protocols

### Answer:

---

C

## Question 4

---

**Question Type:** MultipleChoice

---

Which wireless deployment mode uses a Flex architecture and allows Layer 2 roaming between APs without a physical wireless controller?

**Options:**

---

- A- Unified
- B- autonomous mode
- C- fabric
- D- Cisco Mobility Express

**Answer:**

---

D

## Question 5

---

**Question Type:** MultipleChoice

---

Refer to the exhibit.

```
Switch(config-ip-sla)# udp-jitter 172.29.139.134 5000
Switch(config-ip-sla-jitter)# frequency 300
Switch(config-ip-sla-jitter)# exit
Switch(config)# ip sla schedule 5 start-time now life forever
Switch(config)# end
```

Refer to the exhibit. What is the result of the IP SLA configuration?

**Options:**

---

- A- The operation runs 300 times a day
- B- The operation runs 5000
- C- The rate is configured to repeat every 5 minutes
- D- IP SLA is scheduled to run at 3 a.m

**Answer:**

---

C

## Question 6

---

**Question Type:** MultipleChoice

---

What are two benefits of using Cisco TrustSec? (Choose two.)

**Options:**

---

- A- consistent network segmentation
- B- advanced endpoint protection against malware
- C- simplified management of network access
- D- unknown file analysis using sandboxing
- E- end-to-end traffic encryption

**Answer:**

---

A, C

## Question 7

---

**Question Type:** MultipleChoice

---

When should the MAC authentication bypass feature be used on a switch port?

**Options:**

---

- A- when authentication is required, but the attached host does not support 802.1X
- B- when the attached host supports limited 802.1X
- C- when authentication should be bypassed for select hosts based on their MAC address
- D- when the attached host supports 802.1X and must authenticate itself based on its MAC address instead of user credentials

**Answer:**

---

A
