Question 1

Question Type: MultipleChoice

What's the difference between pushing and pulling code from a CI perspective?

Options:

- A-** Pulling is more efficient.
- B-** When the source informs the build system of a code change, that's pushing. When the build system asks if there are changes to the source code, that's pulling
- C-** Pushing uses more resources.
- D-** When the source informs the build system of a code change, that's pulling. When the build system asks if there are changes to the source code, that's pushing

Answer:

B

Explanation:

Pushing is generally preferred as it assures the action is only performed as changes are made.

Question 2

Question Type: MultipleChoice

What's a benefit of incremental updates over a clean checkout?

Options:

- A- It ensures there are no mistakes
- B- None of these
- C- It's faster
- D- It's more thorough

Answer:

C

Explanation:

Instead of deleting and re-cloning a project repository into a workspace, you can save time by just pulling any changes. This can be problematic when files produced during the build may persist and cause issues in future builds.

Question 3

Question Type: MultipleChoice

Your team is working on a new project to build a CI/CD pipeline for your Docker containers. You have discovered a new plugin to help with your image build. Where would you navigate to install this new plugin?

Options:

- A- There is no graphical Plugin Manager
- B- Dashboard Left Panel -> Manage Jenkins -> Configure System -> Manage Plugins
- C- None of these
- D- Dashboard Left Panel -> Manage Jenkins -> Manage Plugins

Answer:

D

Explanation:

This is how you can reach the Plugin Manager from the dashboard.

Question 4

Question Type: MultipleChoice

Which is an invalid default project parameter?

Options:

- A-** Boolean
- B-** File
- C-** String
- D-** md5

Answer:

D

Explanation:

'md5' is not a common project parameter.

Question 5

Question Type: MultipleChoice

How do you configure the distribution of builds on each node?

Options:

- A- You configure it in the global configuration
- B- It happens largely automatically; although, you can configure the number of executors on a node.
- C- You configure it from 'Configure System'
- D- You configure it from the project configuration

Answer:

B

Explanation:

Distribution of tasks will happen automatically but could depend on the configuration of projects and project-based node assignment.

Question 6

Question Type: MultipleChoice

You can use Jenkins' database to manage users.

Options:

A- True

D- False

Answer:

A

Explanation:

This is the default mode for user management.

Question 7

Question Type: MultipleChoice

Which isn't a common Jenkins build tool?

Options:

A- Ant

B- Excel

C- Docker

D- Gradle

Answer:

B

Explanation:

Excel is not used to build things.
