Question 6

Question Type: MultipleChoice

What term indicates whether an attribute's value is within an expected range?

Options:

- A) Data integrity.

- B) Data validity.
- C) Data processing.
- D) Data availability.

Answer:

B

Explanation:

Data validation means checking the accuracy and quality of source data before using, importing or otherwise processing data. Different types of validation can be performed depending on destination constraints or objectives. Data validation is a form of data cleansing.
