Question 1

Question Type: MultipleChoice

Which port and protocol is used by NTP to communicate?

Options:

- A- TCP port 123 for both the source and destination
- B- TCP port 123 for the source and TCP port 80 for the destination
- C- UDP port 123 for both the source and destination
- D- UDP port 123 for the source and TCP port 80 for the destination

Answer:

C

Question 2

Question Type: MultipleChoice

What is the valid range assigned to a client during a TCP connection?

Options:

A- 20 - 25

B- 443 - 1000

C- 1023 - 2024

D- 40000 - 65535

Answer:

D

Question 3

Question Type: MultipleChoice

Which option is used to configure Network Address Translation (NAT) to provide one-to-one mapping between local and global addresses?

Options:

- A- Outside source static
- B- Overload
- C- Inside source static
- D- PAT

Answer:

C

Question 4

Question Type: MultipleChoice

Which topology is considered a best practice when stacking switches?

Options:

- A- Ring

- B- Cascade
- C- Serial
- D- Daisy-chain

Answer:

A

Question 5

Question Type: MultipleChoice

What are Network Address Translation (NAT) inside global addresses?

Options:

- A- Addresses used by NAT router when sending frames to devices on the local network
- B- Public IP addresses used by the local network to communicate with the Internet
- C- Private IP addresses used by the local network
- D- Public addresses used by other networks outside of the local network

Answer:

B

Question 6

Question Type: MultipleChoice

How is a switch different from a hub?

Options:

- A-** A switch operates at a lower, more efficient layer of the OSI model.
- B-** A switch tracks MAC addresses of all connected devices.
- C-** A switch decreases the number of broadcast storms.
- D-** A switch does not include any latency into the frame transfer time.

Answer:

B

Question 7

Question Type: MultipleChoice

On Switch A, a static route has been redistributed into OSPF. Which type of OSPF router will this process make Switch A?

Options:

- A- Autonomous System Boundary Router (ASBR)
- B- Designated router (DR)
- C- Area Border Router (ABR)
- D- Backbone Router (BR)

Answer:

A

Question 8

Question Type: MultipleChoice

Which Ethernet frame forwarding method works best when the outbound ports run at the same speed as the inbound port?

Options:

- A- Store-and-forward
- B- Fragment-free
- C- Unicast
- D- Cut-through

Answer:

D

Question 9

Question Type: MultipleChoice

Which IPv4 address is in the same network as the IP address 182.15.24.40/23 and assignable to a host device?

Options:

A- 182.15.23.224

B- 182.15.25.0

C- 182.15.25.255

D- 182.15.26.10

Answer:

B
