## Question 1

---

**Question Type:** MultipleChoice

---

In order to provide a highly resilient and highly available network with ECMP and diversity connections to IBM Cloud, how many Direct Link circuits should be recommended?

**Options:**

---

A- 6

B- 3

C- 4

D- 2

**Answer:**

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

When managing file storage in IBM Cloud, what are "Authorized" hosts?

**Options:**

---

- A- Hosts given volume access to a virtual volume storage
- B- Hosts that are authorized to be used to access file storage virtual machines
- C- Hosts directly connected to a particular volume
- D- Hosts given access to a particular volume

**Answer:**

---

D

## Question 3

---

**Question Type: MultipleChoice**

---

What industry compliance program does IBM Cloud File Storage support?

**Options:**

---

- A- High Security Infrastructure Accountability Act (HSIAA)
- B- Payment Card Industry (PCI)
- C- Payment Information Security Management Act (PISMA)
- D- Federal Data Protection Directive FDPD

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

What resource is available in IBM Cloud to help the users quickly create IoT applications based on patterns?

**Options:**

---

- A- jdk

- B-** Starter Kit
- C-** Istio
- D-** Watson API

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

A VPC has been created with a single subnet. Virtual server instances have been deployed on the subnet that have different functions which support a production application. The security team has now said that they want to ensure that network traffic between the different server types can be controlled. How can this be achieved?

**Options:**

---

- A-** Create a VPC load balancer and place each server type into its own back-end pool, then create Layer-7 routing policies that restrict network traffic flowing between the different pools
- B-** Use a Hardware Security Module to create advanced network routing tables that ensure traffic does not route between server ^ types,

as per the security team's wishes

**C-** Create security groups for the different server types with inbound and outbound rules that satisfy the security team, into which the VSIs can be placed

**D-** Create multiple access control lists with rules that satisfy the security team's requirements and associate each VSI to the respective ACL

**Answer:**

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

A regional customer would like to migrate their VMware workloads to IBM Cloud with an emphasis on a lower cost resiliency model to protect against approximately 48 hours of localized outages. The customer currently uses Veeam

**Options:**

---

**A-** Multi zone vCenter Server, Veeam, and NetApp Storage Appliance for backup retention

- B-** Single zone vCenter Server, Veeam, and Object Storage for backup retention
- C-** Multi zone vCenter Server, Veeam, and File Storage for backup retention
- D-** Single zone vCenter Server, Veeam, and Endurance Storage for backup retention

**Answer:**

---

D

## Question 7

---

**Question Type:** MultipleChoice

---

What is a key consideration when connecting VPCs with VPNs?

**Options:**

---

- A-** The VPN must be terminated on a load balancer or Vyatta Gateway
- B-** There is a limit of four VPCs that can be connected via a single VPN
- C-** All server instances in the connected VPCs must use the same SSH key
- D-** The IP addresses of subnets on the connected VPCs must not overlap

**Answer:**

---

A

## Question 8

---

**Question Type:** MultipleChoice

---

A customer has a solution that involves 10TB of Parquet files in their Data Pipeline that will i 20% every week. Which feature of SQL Query would make it a good architectural fit?

**Options:**

---

- A- Uses Performance Storage
- B- Uses Flash Array Storage
- C- Uses RedHat Gluster Storage
- D- Uses Cloud Object Storage

**Answer:**

---

D
