Question 1

Question Type: MultipleChoice

During filling refrigerant for NetCol5000-A, there is no need to put the refrigerant steel cylinder upside down on balance.

Options:

A- True

B- False

Answer:

B

Question 2

Question Type: MultipleChoice

In the FusionModule800 grounding solution, each cabinet is connected to the ground bar of the data center.

Options:

- A- True
- B- False

Answer:

A

Question 3

Question Type: MultipleChoice

During the installation of an air conditioner system, which of the following statements are correct about the draining impurities from the refrigerant pipe?

Options:

- A- Block one of the pipe ports.
- B- Fill the pipe with high-pressure nitrogen.
- C- Quickly remove the pipe plug, and avoid facing people to prevent injury.

D- To discharge nitrogen from the outdoor unit.

Answer:

B

Question 4

Question Type: MultipleChoice

The power system of a UPS2000-G-15K at a site is three-phase input and single-phase output. After installation, it is found that the mains and bypass inputs are three-phase, the output is single-phase, and the mains and bypass inputs share a power source. Which of the following statements are true about the UPS wiring mode?

Options:

A- The wiring mode is incorrect, if the upstream mains input switch is turned on, the UPS will be short-circuited and damaged immediately.

B- The wiring mode is correct. The UPS can start properly.

C- The wiring mode is incorrect. The UPS cannot work in battery mode, but can still work in bypass mode or inverter mode.

D- The wiring mode is incorrect. The correct wiring mode should be single-phase bypass input, three-phase mains input, and one power

source.

Answer:

A

Question 5

Question Type: MultipleChoice

When will the bypass module of Huawei integrated UPS to start to work?

Options:

- A-** Both the active and standby ECMs are abnormal.
- B-** The power module overload times out.
- C-** The UPS works in ECO mode, and the bypass voltage is within the preset range.
- D-** The UPS is just powered on and the inverter is not started.

Answer:

C

Question 6

Question Type: MultipleChoice

Which of the following is a standard component in the FusionModule800 typical configuration?

Options:

A- PAD

B- Video surveillance system

C- Intelligent lock

D- iBattery

Answer:

A

Question 7

Question Type: MultipleChoice

Which features of Huawei integrated UPS can reduce the footprint?

Options:

- A- Intelligent alternating hibernation technology
- B- High power density design
- C- Hot swap
- D- Installation against a wall

Answer:

B

Question 8

Question Type: MultipleChoice

What are the application scenarios of lead-acid batteries in Huawei FusionModule2000 standard configuration?

Options:

- A- Battery pack
- B- Built-in battery cabinet
- C- External battery rack
- D- Battery box

Answer:

B

Question 9

Question Type: MultipleChoice

Which of the following are components of NetCol8000-E220? (Choose three.)

Options:

- A- Indirect heat exchange system

- B- Mechanical auxiliary cooling system
- C- Spray system
- D- Electric control system

Answer:

A, C, D

Question 10

Question Type: MultipleChoice

Which of the following methods can be used to open the access control for the FusionModule2000 smart module?

Options:

- A- Fingerprint
- B- Card reader
- C- Password
- D- Facial recognition

Answer:

A

Question 11

Question Type: MultipleChoice

Three UPS5000-E-400Ks from a 2+1 parallel system. Which of the following statements about the parallel system are true?

Options:

- A-** The parallel system capacity displayed on the LCD is 1200 kVA.
- B-** The networking mode is set to one-to-multiple for one UPS, and set to one-to-one for the other two UPSs.
- C-** If the load is 420 kW, each of two UPSs carries 210 kW load, and the other one is standby and does not carry load.
- D-** If the load is 420 kW, each of the three UPSs carries 140kW load.

Answer:

D

Question 12

Question Type: MultipleChoice

Which of the following statements are true about the dry contact card of the integrated UPS?

Options:

- A-** After the BCB port of dry contact card is connected, the BCB port can be used only if it is enabled on the monitoring software.
- B-** The EPO port can be normally open or normally closed.
- C-** The UPS dry contact card can be used to detect the switch status of the battery system.
- D-** The dry contact card cannot detect the status of an external battery switch.

Answer:

C
