Question 1

Question Type: MultipleChoice

Why should the customer update their printer firmware?

Options:

- A- to apply and use all latest essential security updates for the printer
- B- to ensure that HP can remotely access and fix the printer
- C- to update the network interface to support higher speeds, more connections, and deeper packet inspections for improved security
- D- to fix paper jams and mechanical issues that may happen over time

Answer:

B

Question 2

Question Type: MultipleChoice

What is HP Jet Advantage Quick Assess?

Options:

- A-** a tool that accesses customer data permanently shared with HP
- B-** an IT management tool for quick access to the printer usage information
- C-** a tool that simulates a network attack on printers, proving the network and printer vulnerability
- D-** a tool to expose poorly-configured printers within customer environment

Answer:

D

Question 3

Question Type: MultipleChoice

Why Is just sending a CIS log to the IT admin not enough to stop a malware attack on a printer?

Options:

- A-** It is possible that the CIS log becomes corrupted and cannot be trusted.
- B-** The IT admin may not be looking at the log and by the time they do, the attack already does its damage.
- C-** The CIS log is sent after an attack has taken place, and thus it does not prevent nor stop the attack.
- D-** The CIS log does not contain all the information needed to prevent the attack.

Answer:

C

Question 4

Question Type: MultipleChoice

Why is it important to generate a SYSLOG event and have an integrated SIEM support in printers?

Options:

- A-** It gives HP and the reseller an opportunity to cross sell the HP SIEM software (HP System Security Enterprise).
- B-** The log is machine data, which the SIEM system can read and convert into a more readable format for the IT team to diagnose faster

and correct or prevent further issues.

C- The log is machine data, which the SIEM system can store in a compliant and secure way in case of an audit.

D- It is enforced by law under the GDPR and violations are punishable by up to 20% of the company's annual global revenue.

Answer:

A

Question 5

Question Type: MultipleChoice

Options:

A- HP JetAdvantage Sure Manager

B- HP JetAdvantage Security Admin

C- HP JetAdvantage Security Manager

D- HP JetAdvantage Admin Manager

Answer:

C

Question 6

Question Type: MultipleChoice

What happens when a malware attacks an HP printer with Run-time Intrusion Detection?

Options:

- A-** An error message is immediately displayed on the screen and the device restarts in safe mode.
- B-** A CIS log and error message are sent to alert the security team and the device restarts without a warning.
- C-** A message is displayed on the screen, stating the printer will restart, and a CIS log is simultaneously sent to alert the security team.
- D-** An error message is immediately displayed on the screen, stating an intrusion was detected, a CIS log and error message are simultaneously sent to alert the security team, and the device restarts.

Answer:

D

Question 7

Question Type: MultipleChoice

What does HP Print Security Governance and Compliance Service offer?

Options:

- A-** The customer can outsource monitoring of their printer fleet to trained HP experts, who monitor compliance and identify potential issues once a week.
- B-** The customer can outsource monitoring of their printer fleet to trained HP experts, who monitor compliance and identify potential issues, with proof of compliance maintained for regulatory requirements.
- C-** In case of an attack, HP data forensic experts can trace back the origin of such attack and support legal actions against hackers with court-permissible data.
- D-** The customer can outsource monitoring of their printer fleet to a third-party company that will monitor compliance once a month and contribute data for quarterly meetings.

Answer:

C

Question 8

Question Type: MultipleChoice

How can print jobs, sent from the print servers or personal devices to the printers, be safeguarded?

Options:

- A- Upgrade the printer language to PCL6s to automatically encrypt the data sent to the printer.
- B- Only print from your PC via VPN network cable.
- C- Encrypt all print jobs to avoid the data from being stolen even if intercepted.
- D- Use HP Sure Encryption to encrypt all print job and avoid the data being stolen even if intercepted.

Answer:

C

Question 9

Question Type: MultipleChoice

What is the benefit of a pull print solution?

Options:

- A-** It saves money on tracking documents with personal data and separates them.
