# Question 1

---

**Question Type:** MultipleChoice

---

Why is compliance important for the reliability of the information?

## Options:

---

- A-** Compliance is another word for reliability. So, if a company indicates that it is compliant, it means that the information is managed properly.
- B-** By meeting the legislative requirements and the regulations of both the government and internal management, an organization shows that it manages its information in a sound manner.
- C-** When an organization employs a standard such as the ISO/IEC 27002 and uses it everywhere, it is compliant and therefore it guarantees the reliability of its information.
- D-** When an organization is compliant, it meets the requirements of privacy legislation and, in doing so, protects the reliability of its information.

## Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

A non-human threat for computer systems is a flood. In which situation is a flood always a relevant threat?

### Options:

---

- A- If the risk analysis has not been carried out.
- B- When computer systems are kept in a cellar below ground level.
- C- When the computer systems are not insured.
- D- When the organization is located near a river.

### Answer:

---

B

## Question 3

---

**Question Type:** MultipleChoice

---

What is the most important reason for applying segregation of duties?

**Options:**

---

- A-** Segregation of duties makes it clear who is responsible for what.
- B-** Segregation of duties ensures that, when a person is absent, it can be investigated whether he or she has been committing fraud.
- C-** Tasks and responsibilities must be separated in order to minimize the opportunities for business assets to be misused or changed, whether the change be unauthorized or unintentional.
- D-** Segregation of duties makes it easier for a person who is ready with his or her part of the work to take time off or to take over the work of another person.

**Answer:**

---

C

## Question 4

---

**Question Type:** MultipleChoice

---

What is the definition of the Annual Loss Expectancy?

**Options:**

---

- A-** The Annual Loss Expectancy is the amount of damage that can occur as a result of an incident during the year.
- B-** The Annual Loss Expectancy is the size of the damage claims resulting from not having carried out risk analyses effectively.
- C-** The Annual Loss Expectancy is the average damage calculated by insurance companies for businesses in a country.
- D-** The Annual Loss Expectancy is the minimum amount for which an organization must insure itself.

**Answer:**

---

A

## Question 5

---

**Question Type:** MultipleChoice

---

**Options:**

---

A- Phishing

B- Spyware

C- Virus

D- Worm

**Answer:**

---

A

## Question 7

---

**Question Type: MultipleChoice**

---

In most organizations, access to the computer or the network is granted only after the user has entered a correct username and password. This process consists of 3 steps: identification, authentication and authorization. What is the purpose of the second step, authentication?

**Options:**

---

**A-** In the second step, you make your identity known, which means you are given access to the system.

**B-** The authentication step checks the username against a list of users who have access to the system.

**C-** The system determines whether access may be granted by determining whether the token used is authentic.

**D-** During the authentication step, the system gives you the rights that you need, such as being able to read the data in the system.

**Answer:**

---

C
