Question 1

Question Type: MultipleChoice

Which statement best describes F5 licensing for cloud deployments?

Choose one:

Options:

- A- F5 cloud licenses are only available for small businesses.
- B- F5 cloud licenses are always free.
- C- F5 cloud licensing is based on the number of employees in the organization.
- D- F5 cloud licensing models can be based on throughput, capacity, or usage.

Answer:

D

Question 2

Question Type: MultipleChoice

When deploying F5 instances in a cloud environment, what is the role of the F5 BIG-IQ platform?

Choose one:

Options:

- A- It offers cooking recipes for cloud-based applications.
- B- It serves as a virtual coffee machine.
- C- It centralizes management and monitoring of F5 devices.
- D- It provides weather forecasts for the cloud region.

Answer:

C

Question 3

Question Type: MultipleChoice

Which cloud technology provides on-demand access to computing resources over the internet?

Choose one:

Options:

A- Blockchain

B- Virtual reality

C- Cloud computing

D- Quantum computing

Answer:

C

Question 4

Question Type: MultipleChoice

When designing on-demand provisioning of application services, what variable is crucial to consider?

Choose one:

Options:

- A- Service request automation
- B- Number of physical data centers
- C- User authentication methods
- D- Application licensing costs

Answer:

A

Question 5

Question Type: MultipleChoice

What is an advantage of using serverless computing in cloud deployment?

Choose one:

Options:

- A- Longer application deployment times
- B- Complete control over the underlying infrastructure
- C- Lower cost compared to traditional servers
- D- Requires manual scaling

Answer:

C

Question 6

Question Type: MultipleChoice

What are the key benefits of application mobility in the cloud?

(Select TWO)

Choose:

Options:

- A- Increased application development time
- B- Enhanced data redundancy
- C- Better resource utilization across different cloud environments
- D- Improved disaster recovery options

Answer:

C, D

Question 7

Question Type: MultipleChoice

Scenario: Your organization needs to implement automation for deploying F5 instances across multiple cloud environments. Which tools and practices should be prioritized to ensure a seamless deployment process?

Choose one:

Options:

- A- Rely on manual deployment processes to ensure accuracy.

- B-** Use Terraform for automated provisioning.
- C-** Utilize outdated configuration tools for simplicity.
- D-** Ignore automation and focus on manual scripts.

Answer:

B

Question 8

Question Type: MultipleChoice

Scenario: You are tasked with selecting a cloud service model that allows your team to develop and deploy applications without managing the underlying infrastructure.

Which model would you choose and why?

Choose one:

Options:

- A- Software as a Service (SaaS)
- B- Infrastructure as a Service (IaaS)
- C- Function as a Service (FaaS)
- D- Platform as a Service (PaaS)

Answer:

D

Question 9

Question Type: MultipleChoice

What is a primary goal of designing a cloud bursting solution?

Choose one:

Options:

- A- To create more job positions in the IT department

- B-** To replace all on-premises servers with cloud instances
- C-** To increase the number of office coffee machines
- D-** To seamlessly scale applications from a private data center to the cloud during peak demand

Answer:

D

Question 10

Question Type: MultipleChoice

When using F5 RESTful APIs for automation and orchestration, what are the typical tasks you can automate?

(Select all that apply)

Choose:

Options:

A- Managing security policies

- B- Watering office plants
- C- Monitoring network traffic
- D- Configuring load balancers

Answer:

A, D

Question 11

Question Type: MultipleChoice

What is the primary purpose of using cloud deployment templates in the context of on-demand provisioning?

Choose one:

Options:

- A- To organize company picnics
- B- To quickly provision and configure cloud resources and applications

C- To schedule team-building activities

D- To design custom office layouts

Answer:

B

Question 12

Question Type: MultipleChoice

What is the role of an orchestrator in creating a workflow for dynamic provisioning?

Choose one:

Options:

A- To manage employee dress code policies

B- To design office layouts

C- To organize company holiday parties

D- To automate and coordinate the execution of tasks within the workflow

Answer:

D
