Question 5

Question Type: MultipleChoice

An administrator needs to configure VPN user access for multiple sites using the same soft FortiToken. Each site has a FortiGate VPN gateway. What must an administrator do to achieve this objective?

Options:

- A- The administrator can register the same FortiToken on more than one FortiGate.
- B- The administrator must use a FortiAuthenticator device
- C- The administrator can use a third-party radius OTP server.
- D- The administrator must use the user self-registration server.

Answer:

B

Explanation:

<https://community.fortinet.com/t5/FortiGate/Technical-Tip-How-to-use-FortiToken-for-multiple-units/ta-p/194435>

Question 6

Question Type: MultipleChoice

Which two protocol options are available on the CLI but not on the GUI when configuring an SD-WAN Performance SLA? (Choose two.)

Options:

A- DNS

B- ping

C- udp-echo

D- TWAMP

Answer:

C, D

Question 7

Question Type: MultipleChoice

Which two statements are true about the RPF check? (Choose two.)

Options:

- A- The RPF check is run on the first sent packet of any new session.
- B- The RPF check is run on the first reply packet of any new session.
- C- The RPF check is run on the first sent and reply packet of any new session.
- D- RPF is a mechanism that protects FortiGate and your network from IP spoofing attacks.

Answer:

A, D

Question 8

Question Type: MultipleChoice

Which certificate value can FortiGate use to determine the relationship between the issuer and the certificate?

Options:

- A- Subject Key Identifier value
- B- SMMIE Capabilities value
- C- Subject value

D- Subject Alternative Name value

Answer:

A

Question 9

Question Type: MultipleChoice

A network administrator has enabled full SSL inspection and web filtering on FortiGate. When visiting any HTTPS websites, the browser reports certificate warning errors. When visiting HTTP websites, the browser does not report errors.

What is the reason for the certificate warning errors?

Options:

A- The matching firewall policy is set to proxy inspection mode.

B- The certificate used by FortiGate for SSL inspection does not contain the required certificate extensions.

C- The full SSL inspection feature does not have a valid license.

D- The browser does not trust the certificate used by FortiGate for SSL inspection.

Answer:

D

Explanation:

FortiGate Security 7.2 Study Guide (p.235): 'If FortiGate receives a trusted SSL certificate, then it generates a temporary certificate signed by the built-in Fortinet_CA_SSL certificate and sends it to the browser. If the browser trusts the Fortinet_CA_SSL certificate, the browser completes the SSL handshake. Otherwise, the browser also presents a warning message informing the user that the site is untrusted. In other words, for this function to work as intended, you must import the Fortinet_CA_SSL certificate into the trusted root CA certificate store of your browser.'

Question 10

Question Type: MultipleChoice

A team manager has decided that, while some members of the team need access to a particular website, the majority of the team does not. Which configuration option is the most effective way to support this request?

Options:

- A- Implement a web filter category override for the specified website
- B- Implement a DNS filter for the specified website.
- C- Implement web filter quotas for the specified website
- D- Implement web filter authentication for the specified website.

Answer:

D

Question 11

Question Type: MultipleChoice

An administrator has a requirement to keep an application session from timing out on port 80. What two changes can the administrator make to resolve the issue without affecting any existing services running through FortiGate? (Choose two.)

Options:

- A- Create a new firewall policy with the new HTTP service and place it above the existing HTTP policy.

- B-** Create a new service object for HTTP service and set the session TTL to never
- C-** Set the TTL value to never under config system-ttl
- D-** Set the session TTL on the HTTP policy to maximum

Answer:

B, C
