## Question 1

---

### Question Type: MultipleChoice

---

An administrator is tasked with ensuring that any new virtual server deployed will meet the minimum requirements for the environment. Which of the following items would be included in a baseline for a VM template? (Select TWO).

#### Options:

---

- A- Database
- B- CPU
- C- Encryption keys
- D- Security patches
- E- IP address

#### Answer:

---

B, D

## Question 2

---

**Question Type: MultipleChoice**

---

A system administrator identified an issue on a critical server that is hosted in the cloud. The user community is affected by this issue, but is still able to work. A reboot is needed to rectify this issue. Which of the following steps should the administrator do FIRST to resolve this issue?

**Options:**

---

- A- Contact the user community
- B- Establish a back-out plan
- C- Enter a change request
- D- Reboot the server

**Answer:**

---

C

## Question 3

---

**Question Type: MultipleChoice**

---

Which of the following hypervisors will allocate resources MORE efficiently?

**Options:**

---

- A- Type I
- B- Proprietary
- C- Type II
- D- Open source

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

An administrator is responsible for maintenance and support of servers in the cloud environment. There are over 500 virtual servers spanning across ten physical hosts. The administrator deploys a new application server. The administrator allocated the appropriate virtual resources for the application. Users report slow response after the new server was deployed. Which of the following is the cause of this issue?

**Options:**

---

- A- Storage allocation on the guest OS
- B- Resource pooling mis-configuration
- C- Application licensing expiration
- D- Data segregation on the host OS

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

Management has implemented a policy which states that the OS, the swap file, and data must each reside on its own disk. The virtualization administrator has deployed a VM from a template that has one virtual disk configured. Which of the following steps MUST the administrator take to comply with policy?

**Options:**

---

- A- Add two virtual disks to the VM
- B- Create two partitions on the existing virtual disk
- C- Create three partitions on the existing virtual disk
- D- Add three virtual disks to the VM

**Answer:**

---

A

## Question 6

---

**Question Type: MultipleChoice**

---

Which of the following deployment models BEST meets the requirement to host some of a company's applications in a third party environment while retaining control over some of their data?

**Options:**

---

- A- Hybrid

**B-** Private

**C-** Community

**D-** Public

**Answer:**

---

A

## Question 7

---

**Question Type:** MultipleChoice

---

A company has just established a new branch office that needs to connect back to centrally hosted applications for day to day operations. The branch office has noted that access to many company services are slow and causing a drop in productivity. The company IT department has investigated a plan to improve performance across the link to the branch office without having to pay for more bandwidth from the Internet Service Provider. This plan includes hardware that after installation will allow for much faster access to day to day business applications. Which of the following terms BEST describes the action taken by the IT department?

**Options:**

---

**A-** LAN optimization

- B- WAN optimization
- C- Load balancing
- D- Bandwidth compression

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

Encryption ensures which of the following? (Select TWO).

**Options:**

---

- A- Access control
- B- Data loss
- C- Confidentiality
- D- Authentication

**E-** Data integrity

**Answer:**

---

C, E

## Question 9

---

**Question Type:** MultipleChoice

---

Which of the following would be considered a cold site?

**Options:**

---

- A-** A site that has air conditioning available, but no heat
- B-** A duplicate site that has replication enabled
- C-** A site that has telecommunications and network available
- D-** A site that is completely functional and staffed

**Answer:**

---

C

## Question 10

---

**Question Type:** MultipleChoice

---

A business has a virtualized environment which relies on specific file types, formats, and vendor supported tools. The business is MOST likely using which of the following?

**Options:**

---

A- Type II

B- Type I

C- Open source

D- Proprietary

**Answer:**

---

D

# Question 11

---

**Question Type:** MultipleChoice

---

A system administrator is testing various types of software within VMs on a local workstation while surfing the Internet on a host. Which of the following BEST describes the hypervisor architecture that the administrator is using?

**Options:**

---

- A- Type II
- B- Type I
- C- Open source
- D- Proprietary

**Answer:**

---

A
