Question 1

A business analyst has collected the following legal requirement in support of a project seeking to improve the services provided by a children's charity:

The system must record all the details of the children and young people we interact with.

The project is in the early phases of requirements elicitation. At this stage, the business analyst is trying to ensure that they have captured the broad requirements.

Which style of requirements document is the business analyst constructing, and what additional (essential) attribute will they need to record?

Options:

A- Requirements catalogue; owner

B- Requirements catalogue; requirement ID

C- Requirements list; business area

D- Requirements list; source

Answer:

Question 2

Spicer, a herbs and spices company, is building a new website to grow its business online. A meeting is taking place to prioritize the requirements for inclusion in the first release of the website, which will take place in July. The second release of the website is planned for September.

Miranda, the company buyer is the owner for a requirement that states: 'The system shall provide screens for adding new products.' Miranda informs the meeting that new products are added to the system every three months and that she needs this functionality to be in place before the system goes live. In her view, it is a mandatory requirement.

Peter, who is developing the system, has stated that he can do a one-off upload of all the products into the database ready for launch in July, meaning that the website can initially go live without the 'add new product' functionality.

What priority is Miranda's requirement for the July release?

Options:

A- Could have

B- Must have

C- Should have

D- Want to have

Answer:

B

Question 3

Question Type: **MultipleChoice**

A set of requirements for a new online health information portal have been prioritized using

MoSCoW:

REQ#1: (S)

REQ#2: (C)

REQ#3: (S)

REQ#4: (M)

REQ#5: (M)

REQ#6: (C)

REQ#7: (W)

Only the minimum usable subset was approved for inclusion in the first iteration of the project. After the build for the first iteration began, it was estimated there was enough time to add two additional requirements, without negative impact on the project schedule.

Which two requirements will now be added to the first iteration build?

Options:

A- REQ#1 and REQ#3

B- REQ#2 and REQ#6

C- REQ#4 and REQ#5

D- REQ#6 and REQ#7

Answer:

A

Question 4

Question Type: **MultipleChoice**

A business analyst is categorizing requirements in a requirements catalogue.

Which of the following would be classed as a non-functional requirement?

Options:

Which of these statements are true?

Options:
A- A, B and E

B- A, C and D

C- A, D and E

D- B, C and E

Answer:
A

Question 6

A business analyst is allocating elicited requirements to an appropriate category in a requirements catalogue. Here are five of the captured requirements:

A) A sales person must be able to confirm a sales order.

B) Only customers with a 'normal' status should be permitted to place orders.

C) The order management system should hold the data for 'barred' customers for five years.

D) A stock picker must be able to mark an order as 'picked'.

E) The order management team should be able to view sales orders by time range and status.

Which of these requirements will be classified as functional requirements in the requirements

catalogue?

Options:
A- A, B and C

B- A, D and E

C- B, C and D

D- C, D and E

Answer:

A

Question 7

An international travel operator has a customer services department responsible for investigating complaints made by holidaymakers. The department has five members of staff based in its head office.

A business analyst is working on a project to replace the existing holiday management system and has compiled the following requirements from a range of elicitation activities:

1. The solution should be fully accessible in the English, French and German languages.

2. Users should be able to retrieve holiday details by booking reference number.

3. Holiday providers shall be able to add the details, date and prices of their tours directly onto the system.

4 The solution will be able to support up to 2000 concurrent active users.

5. The solution will be restorable from back-up within 4 hours.

6. The solution should be able to retrieve holiday details within 10 seconds

Which of the following represents the correct categorization of the requirements?

Options:

A- 2x Functional requirement
2x Non-functional requirement
1x General requirement
1x Technical requirement

B- 2x Functional requirement
2x Non-Functional requirement
2x General requirement

C- 2x Functional requirement
3x Non Functional requirement
1x General requirement

D- 3x Functional requirement
2x Non-functional requirement
1x General requirement

Answer:

B

Question 8
