Options:

- A-** It is generated during installation.
- B-** It is generated through the Bigfix License Portal.
- C-** It is generated by BigFix Support and attached to your license.
- D-** It is generated at the command line using openssl.

Answer:

A

Question 4

Question Type: MultipleChoice

BigFix clients that are connected to the enterprise network through a VPN can be configured to download specific resources directly from the Internet instead of their parent Relay.

Which of the following settings can be used to enable this functionality?

Options:

- A- _BESClient_Download_DirectPatchList
- B- _BESClient_Download_Direct_Domainlist
- C- _BESClient_Download_Direct_ByVendor
- D- _BESClient_Download_Direct_SubnetList.

Answer:

B

Question 5

Question Type: MultipleChoice

The Site Administrator responsible for managing a BigFix deployment with 50,000 endpoints and no top-level Relays wants to enable Message Level Encryption (MLE). Which of the following should be considered to support this configuration?

Options:

- A-** All Relays must have at least 8GB RAM to support this configuration.
- B-** The BigFix Root server requires additional CPU resources appropriate to the number of managed endpoints to process the encrypted reports.
- C-** An additional NIC must be added to the BigFix Root server to balance the extra load caused by the encrypted reports.
- D-** The `_BESServer_MaxReport_Decryptions` setting should be set to an appropriate value on the BigFix Root server to minimize the impact from handling the encrypted reports.

Answer:

B

Question 6

Question Type: MultipleChoice

A Master Operator logs into the WebUI to review all actions taken in their BigFix environment. Which page will provide a list of all actions?

Options:

A- Activities

B- Deployments

C- Fixlets and Tasks

D- Reports

Answer:

B
