### Options:

---

- A- Encryption
- B- Cloud Bank
- C- Catalyst
- D- VTL/NAS replication
- E- Flexible I/O HBAs

### Answer:

---

C, D

## Question 2

---

**Question Type:** MultipleChoice

---

Which protocol can be used for accessing StoreOnce VTL target from Veeam?

**Options:**

---

- A- FC
- B- NFSv4
- C- iSCSI
- D- SMBv3

**Answer:**

---

C

## Question 3

---

**Question Type:** MultipleChoice

---

You have proposed a Primera array to a customer for new primary storage. The customer currently has an older 3PAR array that they will continue to use moving forward. The customer would like high availability configured.

Which RMC Peer Copy pre-requisites do you need to point out to the customer? (Choose two.)

**Options:**

---

- A- No license is required
- B- 2-port 10 Gb Ethernet Adapter (NIC) is required
- C- 4-port 1 Gb Ethernet Adapter (NIC) is required in each array
- D- RMC 6.2 is required
- E- Target drive type must match source drive type

**Answer:**

---

C, D

## Question 4

---

**Question Type: MultipleChoice**

---

A customer is purchasing an HPE MSA 2050 for a branch office. They will use it for critical data services. The customer is concerned that 64 snapshots will not be adequate as they grow.

What can be added to the array to address the customer's concerns?

**Options:**

---

- A- Advanced Data Services Suite license
- B- All-inclusive Multi-system license
- C- Virtual Copy license
- D- Adaptive Optimization license

**Answer:**

---

D

## Question 5

---

**Question Type: MultipleChoice**

---

You are proposing a StoreOnce solution to a customer that has always used tape for a backup target.

What should you suggest to ensure that the StoreOnce deduplication is correctly sized?

### Options:

---

A- StoreOnce timeless storage

B- DDAnalyzer

C- proof of concept with StoreOnce VSA

D- OCA

### Answer:

---

B

## Question 6

---

### Question Type: MultipleChoice

---

A customer has the following requirements for a storage solution:

VMware environment

20 of standard business data

400 TB of video archive files

10 GB iSCSI connectivity

They are most concerned with the cost of the solution.

Which HPE storage solution offers the lowest cost while meeting the customer requirements?

**Options:**

---

- A- HPE Nimble
- B- HPE SimpliVity
- C- HPE Primera
- D- HPE MSA

**Answer:**

---

C

## Question 7

---

**Question Type: MultipleChoice**

---

A customer successfully implemented an HPE Primera solution.

Which tool can be used to verify achieved savings from deduplication and compression in the customer solution?

**Options:**

---

A- NinjaSTARS

B- 3PAR Service Processor

C- NinjaCrawler

D- StoreServ System Management Console

**Answer:**

---

D

## Question 8

---

**Question Type: MultipleChoice**

---

A customer successfully implemented an HPE Primera solution.

Which tool can be used to verify performance counters, such as IOPS, match customer requirements?

**Options:**

---

A- NinjaCrawler

B- OneView

C- Recovery Manager Central

D- Primera on-node management GUI

**Answer:**

---

D

## Question 9

---

**Question Type: Hotspot**

---

You are handing over the installed array to customer. The customer wants to review the amount of HDDs and SSDs in the system.

Click the relevant menu option where the front panel of the head shelf can be visualized.

Filter by volume

GROUP

CIC-HPE-Cloud-Volumes

### Performance of All pools

REAL-TIME

#### LATENCY

Get insights from HPE InfoSight™

#### IOPS

**Answer:**

---

## Question 10

---

**Question Type: MultipleChoice**

---

A customer asks you for a recommendation on setting up their new StoreOnce appliance. They plan to use NetBackup and need the highest performance setup they can get. Their local hosts are connected

via FC and the rest are connected via a WAN.

Which backup target type should you recommend?

**Options:**

---

**A-** VTL

**B-** S3

**C-** CIFS

**D-** Catalyst

**Answer:**

---

A

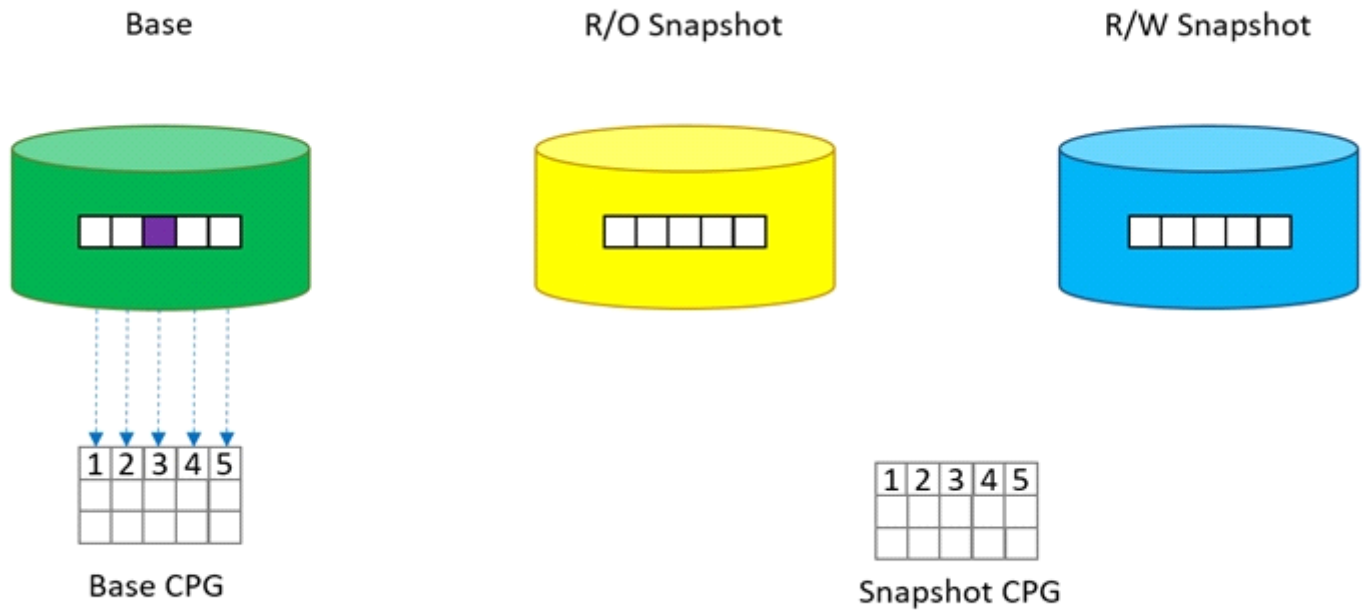

## **Question 11**

---

**Question Type: OrderList**

---

Refer to the exhibit.

You create two snapshots of a thin provisioned base volume in an HPE Primer

a. One snapshot is read only and the other is read-write. A write occurs at the location shown in in the diagram.

Place the actions on the left into the order they are taken on the right.

**Action**

**Order**

Copy block to snapshot CPG

Redirect the snapshots

Update the block with new data

**Answer:**

---

Update the block with new data  
Redirect the snapshots  
Copy the block to snapshot CPG
