Question 1

Question Type: MultipleChoice

Which statement about a server profile for an Apollo system is true?

Options:

- A- Fibre Channel connections can be defined
- B- UEFI optimized is the only available boot mode
- C- Virtual WWNs and MAC addresses can be defined
- D- Enclosure Group Is automatically selected

Answer:

A

Question 2

Question Type: MultipleChoice

Which HPE components can be managed using HPE Composer? (select two.)

Options:

- A- HPE Superdome Flex 280
- B- HPE Synergy Virtual Connect SE 32Gb FC Module
- C- HPE Synergy 480 Compute Modules
- D- HPE B-series SN6600B Fibre Channel Switch
- E- HPE MSA 2062 Storage Array

Answer:

B, D

Question 3

Question Type: Hotspot

As a part of troubleshooting, you have to reinstall the same version of the firmware on an HPE Synergy Compute Module. Click the area within the Firmware section of the server profile that will allow you to install the same firmware version.

Firmware

Answer:

Firmware baseline

Service Pack for Synergy version SY-2021.02.01 ▾

Force installation

Installation Method

Firmware and OS Drivers using Smart Update Tools

Firmware only using Smart Update Tools

Firmware only

Question 4

Question Type: MultipleChoice

For the least disruptive option, select a Smart Update option. Without Smart Update, the

What is required to add remote frame link topology to HPE OneView?

Options:

- A-** The HPE OneView certificate from the primary site must be added to HPE OneView in the remote site.
- B-** The IP address assigned to HPE Composer installed in a remote site must be registered in a primary site.
- C-** Multi-site licenses must be added to HPE OneView and activate for all available HPE Synergy frames.
- D-** Management ports of the remote frame link topology must be connected to the management LAN.

Answer:

D

Question 5

Question Type: DragDrop

For HPE Primera, match each task with the management tool that can be used to perform it.

HPE StoreServ Management Console		Answer Area	Tool	Task
				Replication configuration
				Volume to host presentation
				Automated zoning with SAN Manager
				Adding new storage pool

Answer:

Question 6

Question Type: MultipleChoice

Your customer wants to use HPE OneView for VMware vCenter Server to simplify management of their VMware cluster running on HPE Synergy. The customer is concerned with the cost of additional licenses.

How will you explain licensing rules for this product?

Options:

A- As long as the customer has HPE OneView Global Dashboard deployed, HPE OneView for VMware vCenter Server does not require

any additional licenses.

B- One HPE OneView for VMware vCenter Server license is required per HPE Synergy frame if more than 10 Compute Modules are installed in the frame.

C- If the number of the HPE Synergy Compute Modules installed in HPE Synergy frame is less than 10, no license is required to use HPE OneView for VMware vCenter Server.

D- As long as the server is managed using HPE OneView, the customer can use HPE OneView for VMware vCenter Server without additional licenses.

Answer:

B

Question 7

Question Type: MultipleChoice

You configured downlink aggregation for one of the HPE Synergy Compute Modules in an environment by placing two connections in the same Link Aggregation Group. After you made the changes to the server profile, its status changed to critical.

What can be done to fix this issue?

Options:

- A-** The teaming or bonding driver in the server OS must be configured to enable the LACP and to form the LAG correctly.
- B-** The server profile for a given HPE Synergy compute module should be reapplied, then the Compute Module should be rebooted.
- C-** Link Aggregation Group functionality should be enabled in advanced properties of the Logical Interconnect.
- D-** Ensure that the Link Aggregation Group time-out value matches the server set values.

Answer:

C

Question 8

Question Type: MultipleChoice

Which statement about RoCE network restrictions is true?

Options:

- A-** RoCE networks require Virtual Connect SE 32Gb FC Modules.

- B-** RoCE networks cannot be configured when Virtual Connect modules are used.
- C-** RoCE networks are supported only when PVLANS are enabled.
- D-** RoCE networks are not supported with HPE BladeSystem

Answer:

D

Question 9

Question Type: MultipleChoice

You want to update the firmware for only two HPE Synergy Virtual Connect SE 32Gb FC Modules of a large environment. From which level must this procedure be initiated?

Options:

- A-** Logical Enclosure
- B-** Logical Interconnect Group
- C-** Logical Interconnect

D- Server Profile

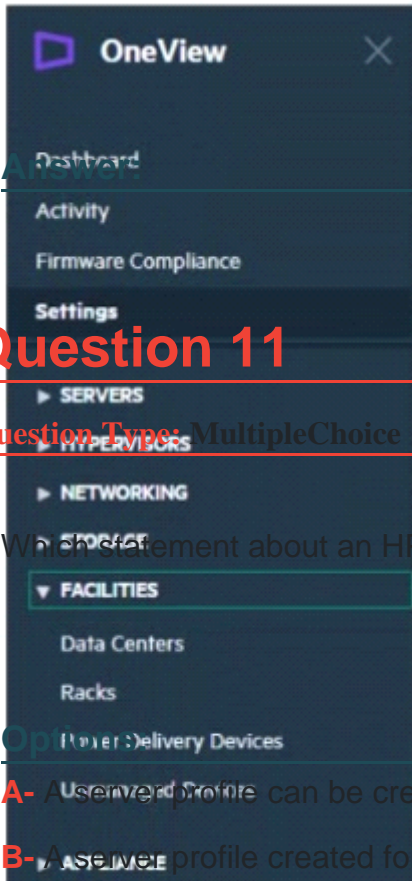

Answer:

A

Question 10

Question Type: Hotspot

Click the option from the HPE OneView main menu that will allow you to define UPS or other components that will work as a placeholder in a rack system.

Question 11

Question Type: MultipleChoice

Which statement about an HPE OneView server profile is true?

- A- A server profile can be created only for HPE BladeSystem, HPE Synergy, and HPE Superdome Flex servers.
- B- A server profile created for a specific server hardware type cannot be moved to a server with a different server hardware type.
- C- A server profile can be used to configure a local storage controller, but cannot be used to configure SAN-based storage.
- D- A server profile can be used to update firmware and drivers when the operating system on the server is up and running.

Answer:

B
