Question 1

Does eLTE-IoT use () technology to improve coverage capabilities?

Options:

A) Power spectral density increase

B) Time domain retransmission mechanism

C) Frequency hopping technology

D) Small packet fast transmission technology

Answer:

A, B

Question 2

AMI is a complete system including smart meters, advanced communication networks, collectors and concentrators, and background software. It can use a two-way communication system to record user detailed load

information

Options:

A) True

B) False

Answer:

A

Question 3

Voice delivery applications can use NB-IoT communication technology

Options:

A) True

B) False

Answer:

B

Question 4
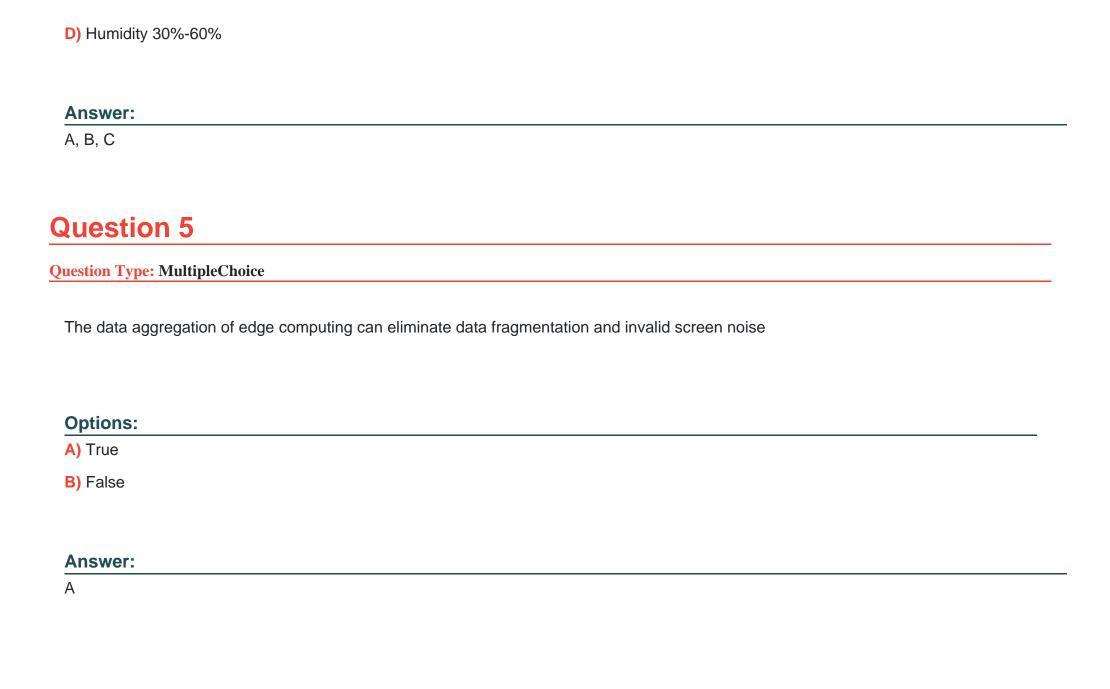

Question Type: MultipleChoice

Which of the following options are the requirements faced by the Internet of Things in the industrial field

Options:

A) Temperature-40 degrees + 70 degrees

B) Strong anti-electromagnetic interference

C) Dustproof and waterproof

D) Humidity 30%-60%

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

The data aggregation of edge computing can eliminate data fragmentation and invalid screen noise

Options:

A) True

B) False

Answer:

A

Question 6

Which parts of the NB-IoT network can SoftRadio simulate

Options:

A) Chip/module

B) NB-IoT base station

C) Gateway

D) Equipment

E) Platform

Answer:

A, B, C

Question 7

eLTE-IoT is similar to NB-IoT, both of which are based on Sub-GHz ISM unlicensed spectrum

Options:

A) True

B) False

Answer:

B

Question 8

Question Type: **MultipleChoice**

In the smart home solution, which of the following methods can allow users to quickly customize the scene

Options:

A) Time trigger

B) Manual trigger

C) Event touch

D) Automatic trigger

Answer:

A, B, C

Question 9

Question Type: MultipleChoice

Among the following options, the ones that belong to IoT security are

Options:

A) Data security

B) Power safety

C) Terminal security

D) Access security

Question 10

Question Type: **MultipleChoice**

Among the following options, the correct description about smart home video surveillance is

Options:

A) High image quality

B) Visual products that integrate different experiences

C) Easy to operate

D) Low latency

Answer:

A, B, C, D

Question 11

Industrial gateways have powerful IoT access capabilities and support FE

Options:

A) True

B) False

Answer:

A

Question 12

In the Huawei smart home ecosystem, equipment suppliers only need to care about the integration of equipment, and application providers only focus on the cloud management service capabilities of the seven major

API categories.

Options:

A) True

B) False

Answer:

A
