Question 1

Question Type: MultipleChoice

As shown in the figure, in the dual-link load balancing hot standby network, AP1 is a new online AP, and both ACs have access configuration. Which AC does AP1 choose to access?

Options:

A- AC1

B- AC2

C- Random access

D- Will not access

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following illegal attack detections require dynamic blacklist support in a WLAN network?

Options:

- A- Flood attack detection
- B- Spoof attack detection
- C- Weak IV attack detection
- D- Anti-brute force cracking

Answer:

A, D

Question 3

Question Type: MultipleChoice

Which of the following techniques are part of the way to implement STA fast roaming?

Options:

- A- PMK caching
- B- Key negotiation down
- C- Improve terminal roaming initiative
- D- Home agent is deployed on the AC

Answer:

A, B

Question 4

Question Type: MultipleChoice

In a WLAN network, when the AP is in the monitoring mode, which packet does the AP use to determine the device type?

Options:

- A- DHCP

- B- ARP
- C- CAPWAP
- D- 802.11MAC

Answer:

D

Question 5

Question Type: MultipleChoice

The following is true about the star network in the Mesh network?

Options:

- A- All connections require data forwarding through the central gateway device
- B- All connections do not need to be forwarded through the central gateway device
- C- All LAN data transmission must pass MPP
- D- All LAN data transmission does not need to pass MPP

Answer:

A, C

Question 6

Question Type: MultipleChoice

In the WLAN network environment where the WIDS function is enabled, the detected AP device MAC addresses include: 01-01-22-22-33-33 02-01-01-22-33-33 02-01-01-22-33 -34 02-01-22-01-01-22 The configured oui white list is 01-01-22; Which of the above is an illegal AP?

Options:

A- 01-01-22-22-33-33

B- 02-01-01-22-33-33

C- 02-01-01-22-33-34

D- 02-01-22-01-01-22

Answer:

B, C, D

Question 7

Question Type: MultipleChoice

Regarding the load sharing method of the dual-system hot backup solution, is the following statement correct?

Options:

- A-** VRRP hot backup mode can be applied to load sharing mode.
- B-** The selection of active and standby devices for dual-system hot backup is consistent with the selection of dual-link active and standby devices.
- C-** The HSB active/standby service backs up related information on the primary device to the backup device.
- D-** Dual-link backup can be applied to load sharing mode

Answer:

B, C, D
