Question 1

Question Type: MultipleChoice

Features of virtualization include partitioning, isolation, encapsulation and standalone A

Options:

A- yes

B- wrong

Answer:

A

Question 2

Question Type: MultipleChoice

Virtualization is divided into computing virtualization, storage virtualization and network virtualization, corresponding to cloud computing cloud host, cloud storage, cloud network

Options:

A- yes

B- wrong

Answer:

A

Question 3

Question Type: MultipleChoice

The following are the main driving forces for the emergence and development of virtualization technologies:

Options:

A- The emergence of the Internet

B- Reduce the failure rate of hardware resources

- C- make full use of hardware resources
- D- Improve the recognition of hardware resources

Answer:

C

Question 4

Question Type: MultipleChoice

The following description of the relationship between virtualization and cloud computing is correct (multiple choices)

Options:

- A- Without cloud computing, there is no value in virtualization
- B- Virtualization is a technology, and cloud computing is a service model. Virtualization has promoted the development of cloud computing.
- C- Without virtualization, cloud computing has no value
- D- Virtualization is one of the important technologies for cloud computing

Answer:

B, C, D

Question 5

Question Type: MultipleChoice

In Huawei FusionCompute, virtual machines using raw device mapping type data storage are not supported (multiple selection)

Options:

A- Snapshot

B- CPU Hot Add

C- Storage thin provisioning

D- Storage live migration

Answer:

A, C

Question 6

Question Type: MultipleChoice

In Huawei FusionCompute, the following measurement factors for computing resource scheduling are incorrectly described as

Options:

- A- When set to 'CPU', the scheduling policy is triggered when the CPU conditions are met
- B- When set to 'memory', the scheduling policy is triggered when the memory conditions are met
- C- When set to 'CPU and Memory', the scheduling policy is triggered when the CPU or memory conditions are met
- D- When set to 'CPU and memory', the scheduling policy is triggered only when the CPU and memory conditions are met

Answer:

D

Question 7

Question Type: MultipleChoice

Set the port group VLAN ID to 0 in Huawei FusionCompute for

Options:

- A- Set the vlan label of the data frame passing through the port group to 0
- B- Allow only data frames tagged with vlan 0 to pass through this port group
- C- Allow 0 VLAN tagged data frames to pass through this port group
- D- No modification is made to the data frames passing through this port group

Answer:

D

Question 8

Question Type: MultipleChoice

Artificial intelligence is the research and development of concepts, methods, technologies and application systems for simulation extension and expansion of artificial intelligence.

A new technology science, the following false statement about artificial intelligence is

Options:

- A- Artificial intelligence does not have the dynamic creativity unique to human consciousness
- B- Artificial intelligence is a technology for items to communicate with each other through the network
- C- Artificial intelligence is not social
- D- Physical processes that are unconscious mechanical

Answer:

B

Question 9

Question Type: MultipleChoice

The following option is not an element of artificial intelligence is

Options:

- A- Computing power
- B- Perceptual analysis
- C- Big data
- D- Scenario

Answer:

B
