## Question 1

---

**Question Type:** MultipleChoice

---

What virtualization platform migration does Huawei business migration tool Rainbow support? (Multiple choice)

**Options:**

---

- A- UCS
- B- XenServer
- C- KVM
- D- Hyper-V

**Answer:**

---

B, C, D

## Question 2

---

**Question Type:** MultipleChoice

---

A company plans to build a cloud data center, the existing office desktop switching to cloud desktop, according to the number of servers and server specifications to calculate the future computing resources required.

**Options:**

---

**A-** True

**B-** False

**Answer:**

---

B

## Question 3

---

**Question Type:** MultipleChoice

---

In the FusionSphere Cloud DC scenario, the solution bundle used is FusionManager + FusionCompute + FusionSphere OpenStack.

**Options:**

---

A- True

B- False

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

In Huawei FusionSphere business migration solution, using offline mirror transformation function,by importing virtual machines from third-party virtualization platforms into Huawei Virtualization Platform, can support virtualized storage and non-virtualized storage.

**Options:**

---

A- True

B- False

**Answer:**

---

B

## Question 5

---

**Question Type:** MultipleChoice

---

In Huawei cloud computing solution, which of the following servers does the virtualization platform support to deploy on? (Multiple choice)

**Options:**

---

- A- RH2288 V2 server
- B- RH2288 V3 server
- C- E9000 server
- D- X6000 server

**Answer:**

---

A, B, C, D

## Question 6

---

**Question Type: MultipleChoice**

---

Which of the descriptions are correct about Huawei data center unified management ManageOne OC operation and maintenance center? (Multiple choice)

**Options:**

---

- A-** ManageOne OC usually needs to deploy local cloud resource management system and physical equipment operation and maintenance system eSight in each data center. It is responsible for local operation and maintenance, configuration and monitoring of data collection.
- B-** In the central node to deploy Domain-level unified operation and maintenance management system OperationCenter, the data center of the cloud resource monitoring information and non- cloud resource monitoring information through the Sight docking together to carry out unified operation and maintenance management.
- C-** The deployment of ManageOne OC relies on the deployment of MangeOne SC and must be planned and deployed in a complete package.
- D-** ManageOne OC in the absence of eSight for docking, does not affect its value in practical work.

**Answer:**

---

A, B

## Question 7

---

**Question Type: MultipleChoice**

---

In Huawei FusionCloud desktop cloud solution, the full-memory virtual desktop is based on IOTailor technology, will store IO data, after online real-time to heavy compression put the full amount into memory, in order to obtain a virtual desktop with high read and write IO. Which of the following description about all memory desktop is wrong?

### Options:

---

- A-** The main storage medium of all memory virtual machine is the host physical memory.
- B-** All memory virtual machines can be deployed in the same cluster with other types of virtual machines (full replication, linked cloning, and rapid encapsulation).
- C-** generally all memory virtual machine template deployment within a cluster no more than two.
- D-** Full Memory Virtual machines do not support snapshots.

### Answer:

---

B
