## Question 1

---

**Question Type:** MultipleChoice

---

Which of the following modules or devices is not supported by the Huawei OceanStor 9000 FRU replacement tool?

### Options:

---

- A- Power module
- B- Online replacement of the hard disk
- C- Cable
- D- IO module

### Answer:

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

NFS is a method for disk file sharing between Unix systems. It supports the application to access the number of servers located on the server disk through the network. According to a system protocol.

**Options:**

---

**A-** TRUE

**B-** FALSE

**Answer:**

---

A

## Question 3

---

**Question Type:** MultipleChoice

---

When the Oceanstor 9000 balancing policy switch is disabled, the node is expanded, the node is deleted or disabled, the hard disk is added, the hard disk is pre-disabled, and the disk is slowed down.

In the scenario, the system does not generate a balancing task. However, if the balancing policy switch is turned on after the node is deleted, the system automatically completes the data balancing.

**Options:**

---

A- TRUE

B- FALSE

**Answer:**

---

B

## Question 4

---

**Question Type: MultipleChoice**

---

The following is true about the Huawei Oceanstor 9000 product system description? (multiple choice)

**Options:**

---

A- The MDS service is responsible for managing the metadata of the file system.

B- The DS service is responsible for storing the file data of the system, but is not responsible for the storage of metadata.

C- The CMS service is responsible for device management of the physical nodes of the cluster.

**D-** Some nodes in the system are responsible for providing MDS services, and some nodes are responsible for providing DS services.

**Answer:**

---

A, C

## Question 5

---

**Question Type: MultipleChoice**

---

What are the advantages of Huawei OceanStor 9000 clustered NAS technology over N8000NAS storage systems? (multiple choice)

**Options:**

---

- A-** Failover is fast, cluster single node failure does not affect business
- B-** Multi-node cluster, load balancing, global cache, providing strong performance
- C-** Engine clusters are followed by SAN storage, and SAN storage can use heterogeneous storage.
- D-** Scale-out engine architecture is extensible

**Answer:**

---

A, B, D

## Question 6

---

**Question Type:** MultipleChoice

---

Which of the following options does not belong to the software modules included in Huawei OceanStor 9000 products?

**Options:**

---

**A-** OceanStor DFS

**B-** VCS

**C-** Wushan SQL

**D-** FusionInsight Hadoop

**Answer:**

---

B

## Question 7

---

**Question Type: MultipleChoice**

---

Which of the following is a Oceanstor 9000 storage system consisting of six P36 nodes? (multiple choice)

**Options:**

---

- A- Front-end business network
- B- Backend storage network
- C- Wushan file system business management network
- D- IPMI Management Network

**Answer:**

---

A, B, C, D

## Question 8

---

**Question Type: MultipleChoice**

---

Which of the following is the correct sequence for powering up the Huawei OceanStor 9000 Big Data Storage System?

### Options:

---

- A- Cabinet -> Switch -> KVM -> Node
- B- Cabinet -> KVM->Switch->Node
- C- Cabinet -> Switch -> Node -> KVM
- D- Cabinet -> Node -> KVM -> Switch

### Answer:

---

A

## Question 9

---

### Question Type: MultipleChoice

---

In which of the following situations occurs, does the Huawei OceanStor 9000 system not start load balancing?

### Options:

---

- A- Add a node

- B- Add a hard disk
- C- The hard disk appears 3 times offline within 10 minutes
- D- Hard disk pre-failure

**Answer:**

---

C

## Question 10

---

**Question Type:** MultipleChoice

---

Huawei OceanStor 9000 system cluster health status includes: (multiple choice)

**Options:**

---

- A- Normal
- B- Failure
- C- Partial damage
- D- Downgrade

**Answer:**

---

A, B, C, D
