Question 1

Question Type: MultipleChoice

In Huawei Fusioninsight HD system, there are 3 data blocks in the storage copy. When the data block is lost on one node, you need to manually copy a copy to the node.

Options:

A- True

B- False

Answer:

B

Question 2

Question Type: MultipleChoice

A Fusioninsight Manager user rights management does not support which configuration?

Options:

- A- Configure roles for users
- B- Configure permissions for roles
- C- Configure roles for user groups
- D- Configure permissions for user groups

Answer:

D

Question 3

Question Type: MultipleChoice

In FusionInsightHD system, which disk plans do cluster nodes need to consider? (Multiple choices)

Options:

- A- Host OS disk planning
- B- Control Node Metadata Disk Plan
- C- Management node metadata disk planning
- D- Data node data disk planning

Answer:

A, B, C, D

Question 4

Question Type: MultipleChoice

What are the irony errors about Fusioninsight Manager? (Multiple choices)

Options:

- A- You can query each important operation through the Audit interface of Fusioninsight Manager
- B- Customers who cannot download a single component through Fusioninsight Manager
- C- After the cluster deployment is completed, cluster expansion cannot be performed through Fusioninsight Manager. You can only expand the cluster by uninstalling and rebuilding the cluster

D- You can query the specific information of each alarm through the Alarms alarm interface of Fusioninsight Manager

Answer:

B, C

Question 5

Question Type: MultipleChoice

Regarding the relationship between Hive and other Hadoop components, what is wrong with the following description?

Options:

A- Hive finally stores data in HDFS

B- Hive SQL is based on MapReduce tasks

C- Hive is a data warehouse tool for the Hadoop platform

D- HiveHBase has strong dependencies

Answer:

D

Question 6

Question Type: MultipleChoice

Which option in the Spark component is not a transformation operation?

Options:

A- join

B- distinct

C- reduceByKey

D- reduce

Answer:

D

Question 7

Question Type: MultipleChoice

In the ft SolrClGud mode, is the following description about Solr related concepts correct? (Multiple choices)

Options:

- A-** Collection is a logically complete index in the SolrCloud group. It can be divided into one or more shards. These shards use the same Config Set.
- B-** Config Set is a set of configuration files required by Solr Core to provide services, including solrconfig.xml and schema.xml.
- C-** Shard is a logical shard of the collection. Each Shard contains one or more replicas.
- D-** It is determined by election which replica is the leader-only the leader replica can process index and query requests. Will accept index and Xuansi requests.

Answer:

A, B, D

Question 8

Question Type: MultipleChoice

When Solr creates a collection, the recommended route algorithm is composited router, so the collection can expand the shard.

Options:

A- is correct

B- False

Answer:

B

Question 9

Question Type: MultipleChoice

In Hadoop, if `yam.schedulerxcapacity.root.QueueA.minimum-user-limit-percent` is set to 50, what is wrong with the following statement?

Options:

A- A user submits a task and can use 100% of QueueA's resources

B- QueueA can only get up to 50% of resources per user

C- If there are already two user tasks running in QueueA, then the task submitted by the third user needs to wait for the resources to be released

D- QueueA must ensure that each user gets at least 60% of the resources

Answer:

B

Question 10

Question Type: MultipleChoice

How many HDFS blocks are saved by default in a Fusioninsight HD system?

Options:

A- 3 copies

B- 2 copies

C- 1

D- Not sure

Answer:

A

Question 11

Question Type: MultipleChoice

HBase region in the Hadoop platform is managed by which service process.

Options:

A- HMaster

B- DataNode

C- RegionServer

D ZooKeeper

Answer:

C
