## Question 1

---

**Question Type:** MultipleChoice

---

Which of the following does not belong to the software component FC SAN storage network?

### Options:

---

- A- Storage device side software system
- B- Switch Operating System
- C- Storage device side HBA Driver
- D- The client application

### Answer:

---

D

## Question 2

---

**Question Type:** MultipleChoice

---

Storage arrays, which of the following situations will cause the LUN to write into write-through policy? (Choose three)

**Options:**

---

- A- Fault management network port
- B- Fan failure
- C- BBU failure
- D- Controller failure

**Answer:**

---

B, C, D

## Question 3

---

**Question Type: MultipleChoice**

---

A customer wants to buy a SAN array, Oracle and SQLServer databases used in business, he should choose the appropriate storage array from which indicators?

**Options:**

---

- A- IOPS
- B- Bandwidth
- C- CPU utilization
- D- Memory utilization

**Answer:**

---

A

## Question 4

---

**Question Type: MultipleChoice**

---

The following statement is correct? (Choose two)

**Options:**

---

- A- Copied from the remote LUN mapping to the application server can be read

- B-** Virtual snapshots can be mapped to the application server after you read them
- C-** After the full amount LUN copy is complete, the target LUN can be mapped to the application server, and its literacy
- D-** Incremental LUN copy process, the target LUN can be mapped to the application server, and its literacy

**Answer:**

---

B, C

## Question 5

---

**Question Type: MultipleChoice**

---

Host side reported "IO error or IO Timeout" fault, the problem can be excluded from the storage side which of the following aspects?  
(Choose three)

**Options:**

---

- A-** Whether the normal state storage RAID LUN
- B-** Whether to store the state of the physical hard disk read and write properly
- C-** FC or iSCSI link state whether normal

**D-** Username and password to log array

**Answer:**

---

A, B, C

## Question 6

---

**Question Type: MultipleChoice**

---

Contains nodes (node) in a standard fiber environment, port (port), link (link) an integral part of the following statement is correct there?  
(Choose three)

**Options:**

---

**A-** Node refers to fiber optic equipment, such as. servers, disks, etc.

**B-** Each node at least one port, the port provides a connection to the actual external, typically by the server to achieve the HBA

**C-** Link is the actual transmission medium, the information used to connect to another node link ports composed by a pair of fiber optic cable from a node, a receiver connected to fiber-optic cable and port, the port is an incoming message fiber-optic cable and port transmitter is connected, the information came to this port

**D-** A node can have only one port

**Answer:**

---

A, B, C

## Question 7

---

**Question Type: MultipleChoice**

---

Hard disk media storage system scan OceanStor series in what way?

**Options:**

---

- A-** All sectors of the hard disk is read sequentially
- B-** Use the built-in hard disk media scan feature
- C-** Using third-party software embedded controller
- D-** Independent development of new analysis software

**Answer:**

---

B

## Question 8

---

**Question Type:** MultipleChoice

---

Which of the following features of the storage array to the resource pool space is needed? (Choose two)

### Options:

---

- A- Asynchronous remote replication
- B- Synchronous remote replication
- C- A copy of the full amount LUN
- D- Incremental LUN copy

### Answer:

---

A, D
