Question 1

Question Type: MultipleChoice

SAS wide port defined on the transmission medium, which of the following is wrong?

Options:

- A- Wide port is composed of a plurality of phy
- B- Each consisting of wide port SAS phy whose address is the same
- C- Port connected to the port width is not necessarily wide port
- D- Wide bandwidth for each port is the sum of the bandwidth phy

Answer:

C

Question 2

Question Type: MultipleChoice

In SAN storage expansion, the box's hard disk cascade two links are pros and cons to cascade over the forward cascade with higher reliability.

Options:

A- True

B- False

Answer:

B

Question 3

Question Type: MultipleChoice

LUN copy technology on the following statements is correct. (Choose two)

Options:

- A- Copy process does not need to stop business
- B- Only supports IP-based networks LUNCopy
- C- Support for dynamically changing the copy speed
- D- Support for third-party storage arrays LUNCopy

Answer:

C, D

Question 4

Question Type: MultipleChoice

Troubleshooting SAN storage systems, the log cannot be judged by ISM failures, which log files can be further analyzed by the system?
(Choose three)

Options:

- A- Under Debug_information catalog the most important information for the message and SES_log
- B- log_reset.txt recording system restarts and causes

C- log_debug.txt recording system kernel log messages

D- log_restart.txt recording system restarts and causes

Answer:

A, B, C

Question 5

Question Type: MultipleChoice

Disk pre-copy technology S5000T storage system which includes two key components? (Choose two)

Options:

A- Failure prediction

B- Copies of data

C- Disk Offline

D- Online Alarm

Answer:

A, B

Question 6

Question Type: MultipleChoice

IO request FC-SAN, the server -side components which need to go through in order to reach the ultimate storage medium: (Choose three)

Options:

- A- Server operating system
- B- Fabric Switches
- C- Front-end interface card storage devices
- D- Storage device management network port

Answer:

A, B, C
