Question 1

A rule developer needs to write an action rule to apply a 20% discount to customers whose status is GOLD irrespective of the value of their shopping cart or SILVER when the value of their shopping cart is more that $100. Which two action rules correctly represent this business rule scenario?

```
A. if
        the status of the customer is GOLD
        or the status of the customer is SILVER
        and the value of the shopping cart is more than 100
    then
        apply a 20% discount

B. if any of the following conditions is true:
        - the status of the customer is GOLD
        - the status of the customer is SILVER and the value of the shopping cart is more than 100
    then
        apply a 20% discount
```

```
C. if any of the following conditions is true:
       - the status of the customer is GOLD
       - the status of the customer is SILVER
       - the value of the shopping cart is more than 100
   then
       apply a 20% discount

D. if
       (the status of the customer is GOLD
       or the status of the customer is SILVER)
       and the value of the shopping cart is more than 100
   then
       apply a 20% discount

E. if
       the status of the customer is GOLD
       and the value of the shopping cart is more than 100
       or the status of the customer is SILVER
   then
       apply a 20% discount
```

Options:

A- Exhibit: A

B- Exhibit: B

C- Exhibit: C

D- Exhibit: D

E- Exhibit: E

Answer:

A, E

Question 2

Question Type: MultipleChoice

Which statement is true if a ruleset's XOM is based on an XML schema (.xsd file)?

Options:

A- The RuleApp can only be deployed from Rule Designer.

B- A managed XOM must be deployed to execute the ruleset.

C- The XOM can only be deployed by using the Rule Execution Server console.

D- The XML schema is packaged as a .xom file in the ruleset archive and deployed with the RuleApp.

Answer:

D

Explanation:

Question 3

Question Type: **MultipleChoice**

Which execution algorithm should be used for a rule task with rule chaining?

Options:

A- RetePlus

B- Fastpalh

C- Sequential

D- Working memory

Answer:

A

Explanation:

Question 4

Question Type: **MultipleChoice**

ODM V8.9.1 is being installed on several nodes in silent mode by using a response file. What needs to be included in the response file during installation?

Options:

A- Sample server port number

B- IBM Installation Manager home location

C- Repository path for the sample server installation

D- Installed WebSphere Application Server home location

Answer:

D

Question 5

How many business rules are captured in the decision table below where the Customer Status and Purchase Amount are condition columns?

Customer Status	Purchase Amount		Discount
	MIN	MAX	
GOLD	0	100	10%
	100	1000	20%
	>1000		25%
SILVER	0	100	5%
	100	1000	10%
	>1000		20%
BRONZE	>100		5%
OTHERWISE	>1000		5%

Options:

A- 4

B- 6

C- 7

D- 8

Answer:

A

Question 6

Question Type: MultipleChoice

How would the following business policy be classified?

The vehicle usage MUST NOT BE Commercial

Options:

A- Calculation

B- Constraint

C- Guideline

D- Inference

Question 7

Question Type: MultipleChoice

What is needed when executing a decision service by posting a REST request?

Options:

A- ruleset library

B- ruleset name

C- XOM JAR file

D- RuleApp JAR file

Answer:

D

Question 8

Which statement regarding decision services is true?

Options:

A- The main rule project can be referenced by a XOM for purposes of exposing methods in rules.

B- Decision services can be configured through parameters in the properties when rule extractors are used.

C- The source rule project for the decision operation determines the rules, variables, and dependent projects that are eligible to be included in the rule set.

D- When a decision service with multiple rule projects is published to Decision Center, standard rule projects are published as source decision service artifacts.

Answer:

C

Question 9

A developer needs to build an asynchronous decision service that can process extremely high transaction volume for a small input request and from an application that is not mission critical.

Which API offers the fastest throughput, sufficient reliability, and least amount of client side development for this decision service?

Options:

A- SOAP/XML web service

B- REST/JSON web service

C- Java Message Service (JMS)

D- Remote interface of an EJB rule session

Answer:

D

Question 10

Which statement is true regarding the decision service rule project hierarchy?

Options:

A- A standard rule project can be changed to a main rule project when it is reference by other rule projects.

B- Changing a rule project to a main rule project can affect the deployment and synchronization of the project.

C- Changing a main rule project to a standard rule project removes the main rule project references to other rule projects.

D- Changing a rule project from a standard rule project to a main rule project always requires changes to the way rule projects are referenced.

Answer:

B

Explanation:

Question 11

Why are synchronization connection entries useful?

Options:

A- To keep the connection open to the Decision Center database.

B- To track the state of the synchronization with Decision Center.

C- To resolve the conflicts between Rule Designer and Decision Center.

D- To enable Rule Designer to connect to Decision Center without user sec

Answer:

B

Explanation:
