Question 1

A case has started a process. When the case content objects are updated in the case, which statement is true?

Available Choices (select all choices that are correct)

Options:

A- For cases that parent a process, content objects shared are locked to prevent lack of synchronization issues.

B- The child process gets delayed updates of the changes that can be configured in the admin console.

C- The child process is not aware of the changes, it should be updated independently.

D- The child process is synchronously updated with the changes.

Answer:

D

Question 2

A developer has worked with end-users in a requirements session to establish what can be selected on the Single Select control in CoachView1 seen below. To ensure that the selections are easily maintainable, the developer wants to dynamically lookup the selections at runtime. What two options does the developer have available to achieve this requirement? (Choose two.)

▼ **Items**

Item lookup mode: 🔵 [Items From Static List   ⌄]

▼ **Static list:** 🔵

	name	value	
0	Selection 1	Selection 1	
1	Selection 2	Selection 2	
2	Selection 3	Selection 3	
	+		

▸ **Item selection data:** 🔵

▸ **Output business data:** 🔵

Options:

A- Pass a business object via the CoachView1 Configuration Options, update the Item lookup mode to Items From Config Options and select the business object as the Binding of the Single Select view in the General tab.

B- Keep the selections in the Static list, pass a business object via the CoachView1 Configuration Options and select the business object as Output business data so that the geclcemText n method on the Single Select view returns the selection items via the business object.

C- Pass a business object via the CoachView1 Configuration Options, update the Item lookup mode to Items From Service and select the business object as Service input data for the Default List Items Service.

D- Pass a business object via the CoachView1 Configuration Options, update the Item lookup mode to Items From Config Options and select the business object as Item selection data.

E- Update the Item lookup mode to Items From Service and select a service flow that follows the Ajax service specification as the List items service.
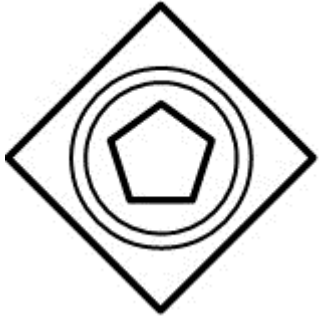

Answer:

A, C

Question 3

Question Type: MultipleChoice

Refer to exihibit
