Question 1

Question Type: MultipleChoice

Two pipelines (A & B) are entering a Joiner transformation with each having a record size of 100 bytes. Pipeline A has a total of 1000 records and Pipeline B has a total of 1,000,000 records. Which pipeline should be designated the master pipeline?

Options:

- A- Pipeline A
- B- Pipeline B
- C- Both Pipelines should be cached for performance reasons
- D- Pipeline B if and only if Pipeline A is sorted

Answer:

A

Question 2

Question Type: MultipleChoice

Which of the following statements is correct on workflow events?

Options:

- A-** A predefined (or file-wait) Event Wait task waits for a file to appear at the specified location. As soon as the file appears, the event succeeds and the file can be processed by the subsequent mapping
- B-** A user-defined event can be created and raised in one workflow and then used in another
- C-** A predefined (or file-wait) Event Wait waits for a file to appear at the specified location. As soon as the file appears, it is deleted and the subsequent task will start.
- D-** A user-defined event can be created in either the Event Wait or Event Raise task

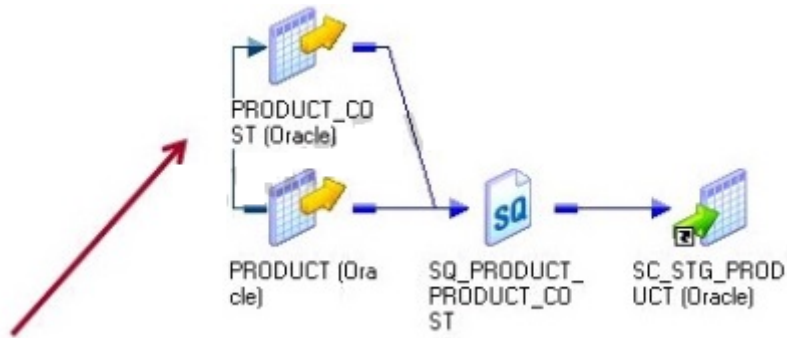

Answer:

C

Question 3

Question Type: MultipleChoice

Given the picture shown below:

Identify all of the true and correct statements listed below. Note: The red (or gray) arrow points at the line in question.

The line on the left hand side of the picture which connects PRODUCT TO PRODUCT_COST : Choose 2 answers

Options:

- A- Describes a LEFT OUTER JOIN between PRODUCT AND PRODUCT_COST
- B- Describes an INNER JOIN between PRODUCT AND PRODUCT_COST
- C- Describes a secondary data flow needed for a sub-select process between PRODUCT AND PRODUCT_COST
- D- Can be created within Informatica PowerCenter

Answer:

B, D

Question 4

Question Type: MultipleChoice

Referring to an Unconnected Lookup transformation: Which one of the following is true? (choose one)

Options:

- A- An unconnected lookup can return multiple rows while a connected lookup may return only one
- B- Both connected and unconnected lookups can return multiple rows
- C- An unconnected lookup may return only one value while a connected lookup may return multiple rows
- D- Both connected and unconnected lookups can return only one row

Answer:

C

Question 5

Question Type: MultipleChoice

In which of the following selections are all of the transformations active?

Options:

- A- Expression, Router, Joiner
- B- Update Strategy, Expression, Aggregator
- C- Stored Procedure, Joiner, Router
- D- Router, Update Strategy, Joiner

Answer:

D

Question 6

Question Type: MultipleChoice

Which of the following is a reusable task available in workflow manager?

Options:

A- Decision

B- Assignment

C- Control

D- Command

Answer:

B

Question 7

Question Type: MultipleChoice

What is a pipeline lookup transformation?

Options:

A- A lookup created using a pipeline which contains a target

- B-** A lookup cache split over pipelines of a partitioned mapping
- C-** A lookup associated with the Source Qualifier or an Application source such as JMS or SAP
- D-** A pipeline lookup does not exist

Answer:

C

Question 8

Question Type: MultipleChoice

Which command line tool would you use to execute a workflow?

Options:

- A-** infasetup
- B-** infacmd
- C-** pmcmd
- D-** pmrep

Answer:

C

Question 9

Question Type: MultipleChoice

Which is the correct priority of assigning a mapping variable?

Options:

- A-** Workflow parameter file, session parameter file, pre-session assignment, repository value, declared initial value, default value
- B-** Session parameter file, workflow parameter file, repository value, declared initial value
- C-** Repository value, workflow parameter file, pre-session assignment, session parameter file, default value
- D-** Repository value, declared initial value, default value

Answer:

A

Question 10

Question Type: MultipleChoice

Which port types are applicable to the Stored Procedure transformation?(Choose all that apply) Choose 3 answers

Options:

- A- Input
- B- Output
- C- Variable
- D- Return

Answer:

A, B, D

Question 11

Question Type: MultipleChoice

What function could be used to exchange 'i' with 'l' in the COMPANY port given the following expression? function name{1, COMPANY, 'i', 'l')

Options:

- A- CHOOSE
- B- REPLACECHR
- C- REG_REPLACE
- D- INSTR

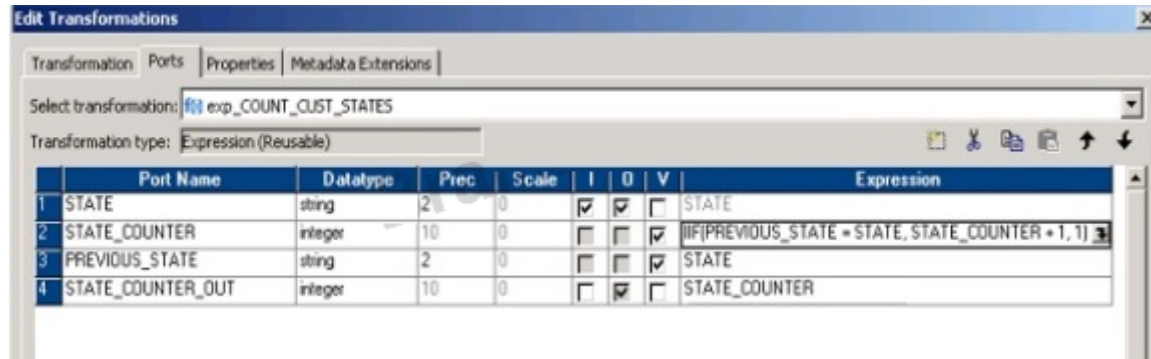

Answer:

B

Question 12

Question Type: MultipleChoice

In the Expression transformation graphic below, what is the value of the PREVIOUS_STATE port for row 2, given that the value for the STATE port was 'CA' for row 1?

Options:

- A- STATE
- B- 'CA'
- C- NULL
- D- Value of the PREVIOUS_STATE port is based upon its declared default value

Answer:

B
