Question 1

Question Type: Hotspot

You have an Azure Virtual Desktop deployment that uses Cloud Cache to store user profiles.

You plan to deploy Microsoft Defender Antivirus exclusions to the session hosts by using the following PowerShell script.

```

$Cloudcache = $true
$StorageAcct1 = "storageacct1"
$StorageAcct2 = "storageacct2"

```

each statement based on the information presented in the script.

Answer Area

VHD and VHDX antivirus exclusions will be enabled for [answer choice].

- the Cloud Cache folder, storageacct1, and storageacct2
- the Cloud Cache folder only
- storageacct1 and storageacct2 only
- the Cloud Cache folder, storageacct1, and storageacct2

Answer:

Antivirus exclusions for the Microsoft Teams caching folder will be enabled for the [answer choice].

- Media-stack folder, Cache folder, and all text files
- Cache folder only
- Media-stack folder and Cache folder
- Media-stack folder, Cache folder, and all text files

Question 2

Question Type: Multiple Choice

```

$StorageAcct1 = "storageacct1"
$StorageAcct2 = "storageacct2"
$FileList = "file.core.windows.net\share2\*.VHD",
"\$StorageAcct2.file.core.windows.net\share2\*.VHDX"
$ProcessList = `
"%ProgramFiles%\FSLogix\Apps\frxccd.exe",`
"%ProgramFiles%\FSLogix\Apps\frxccds.exe",`
"%ProgramFiles%\FSLogix\Apps\frxsvc.exe"

```

Question: 182

You have an Azure Virtual Desktop deployment that contains two host pools named Pool1 and Pool2.

Pool1 contains 10 session hosts and supports 100 concurrent users. Pool2 contains two session hosts and supports 20 concurrent users.

You need to recommend an Azure Virtual Desktop update solution that meets the following requirements:

- * All service updates must be tested before reaching general availability.
- * Testing must have a minimal impact on the organization.

```

If ($CloudCache) {
  Add-MpPreference -ExclusionPath "%ProgramData%\FSLogix\Cache\*.VHD"
  Add-MpPreference -ExclusionPath "%ProgramData%\FSLogix\Cache\*.VHDX"
  Add-MpPreference -ExclusionPath "%ProgramData%\FSLogix\Proxy\*.VHD"
  Add-MpPreference -ExclusionPath "%ProgramData%\FSLogix\Proxy\*.VHDX"}

```

* No new host pools can be created.

What should you include in the recommendation?

Options:

- A-** From the properties of Pool2, enable the validation environment.
- B-** From the properties of Pool2, assign a scaling plan.
- C-** From the properties of Pool1, enable the validation environment.
- D-** From the properties of Pool1, assign a scaling plan.

Answer:

A

Question 3

Question Type: OrderList

-

You have an Azure Virtual Desktop personal host pool. Each session host in the pool that has an operating system disk and a data disk.

You need to back up the session host data disks.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Answer Area

Create a backup policy and configure a backup.

Grant permissions for the vault.

Create a backup vault.

Configure a managed identity.

Create a Recovery Services vault.

Answer:

Create a Backup Policy and configure a backup.

Question 4

Question Type: MultipleChoice

You have an Azure subscription named Subscription that contains an Azure Virtual Desktop host pool named HostPool1.

HostPool1 is managed by using Microsoft Intune. Subscription1 contains 50 users that connect to HostPool1 by using computers that run Windows 10.

You need to prevent the users from copying files between an Azure Virtual Desktop session and the computers. The solution must minimize administrative effort.

What should you do?

Options:

- A- Modify the RDP properties of HostPool1.
- B- Create a Conditional Access policy in Azure Active Directory (Azure AD).
- C- Create a compliance policy in Intune.
- D- Create a configuration profile in Intune.

Answer:

A

Question 5

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment.

You plan to deploy Update Management to manage automated updates for server-based session hosts.

You need to configure the prerequisites for Update Management.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Create a Log Analytics workspace.
- B- Create an Azure Automation account.
- C- Create an Azure Service Health alert rule.
- D- Enable the Application Insights Agent.

E- Configure Azure Network Watcher.

Answer:

A, B

Explanation:

<https://learn.microsoft.com/en-us/azure/architecture/hybrid/azure-update-mgmt>

Question 6

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment that contains the host pools shown in the following table.

Name	Type	Location
Pool1	Windows 10 Enterprise, personal	East US
Pool2	Windows Server 2019, pooled	East US

You need to create a disaster recovery environment in the West US region. The solution must minimize costs and administrative effort.

What should you do?

Options:

- A- Regenerate the token and reregister the virtual machines in the host pools.
- B- Create two new host pools in the West US region.
- C- Run the Invoke-RdsUserSessionLogoff cmdlet.
- D- Create an Azure Site Recovery plan.

Answer:

B

Question 7

Question Type: MultipleChoice

You have an Azure subscription. The subscription contains a virtual machine named Server1 that runs Windows Server and is deployed to the West US Azure region.

You deploy a new Azure Virtual Desktop host pool named HostPool1 to the East US Azure region.

You need to ensure that all the traffic between HostPool1 and Server1 is routed via the Microsoft backbone network.

What should you use?

Options:

- A- service endpoints
- B- virtual network peering
- C- routing tables
- D- Azure Traffic Manager

Answer:

A

Explanation:

'Virtual Network (VNet) service endpoint provides secure and direct connectivity to Azure services over an optimized route over the Azure backbone network.' <https://learn.microsoft.com/en-us/azure/virtual-network/virtual-network-service-endpoints-overview>

Question 8

Question Type: Hotspot

You have an Azure Virtual Desktop deployment that contains the session hosts shown in the following table.

Name	Configuration
Host1	RDP Shortpath for managed networks is enabled.
Name	Remote Desktop client type
User1	Windows desktop
Name	Connection type
Location1	Site-to-Site VPN
Location2	Internet

is not configured.

ie statement is true. Otherwise, select No.

point.

Answer Area

Statements	Yes	No
Answer: RDP Shortpath is used when User2 is in Location1 and connects to Host1.	<input type="radio"/>	<input type="radio"/>
RDP Shortpath is used when User1 is in Location1 and connects to Host2.	<input type="radio"/>	<input type="radio"/>
RDP Shortpath is used when User1 is in Location2 and connects to Host1.	<input type="radio"/>	<input type="radio"/>

Question 9

Question Type: MultipleChoice

You have an Azure subscription that contains the resources shown in the following table.

You need to ensure that users can restore files saved to their FSLogix profile.

What should you do?

Options:

- A-** From the CPool1 blade in the Azure portal, create a new volume.
- B-** From the Azure portal, create an Azure Backup vault and a backup policy.
- C-** From the Volume1 blade in the Azure portal, create a snapshot policy.
- D-** From the Azure portal, create a Recovery Services vault and a backup policy.

Answer:

D

Explanation:

From the docs: Azure Files Premium tier integrates with Azure Backup and is supported in conjunction with FSLogix. Azure NetApp Files offers a similar snapshot mechanism to make copies of your FSLogix profile containers. <https://learn.microsoft.com/en-us/azure/architecture/example-scenario/wvd/windows-virtual-desktop-fslogix#backup-and-restore>

Question 10

Question Type: Hotspot

Answer Area

Answer

HostPool1:

	▼
Availability zones	
Azure Backup	
Azure Site Recovery	
Azure Traffic Manager	

Share

Question 11

Question Type: MultipleChoice

You have an Azure Virtual Desktop deployment.

You need to monitor the deployment by using the Azure Virtual Desktop Insights solution in Azure Monitor.

What should you use as the Diagnostic settings destination for the host pool?

storage1:

	▼
Geo-redundant storage (GRS)	
Geo-zone-redundant storage (GZRS)	
Locally-redundant storage (LRS)	
Zone-redundant storage (ZRS)	

Options:

- A- Event hub
- B- Log Analytics workspace
- C- Storage account

Answer:

B
