### **Question 1**

#### **Question Type: Hotspot**

You have two Azure subscriptions that are linked to an Azure Active Directory (Azure AD) tenant named contoso.com and contain an Azure Virtual Desktop deployment. The tenant contains a user named User1.

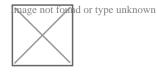

When User1 signs in to Azure Security Center, the user receives the message shown in the following exhibit.

You need to ensure that User1 can manage security information for the tenant. The solution must use the principle of least privilege.

What should you do? To answer, select the appropriate options in the answer area.

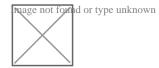

NOTE: Each correct selection is worth one point.

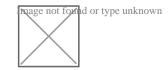

Hot Area:

**Question 2** 

**Question Type:** Hotspot

**Question Type:** Hotspot

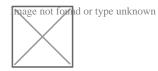

HOTSPOT -

You have an Azure Virtual Desktop host pool named HostPool1 that contains 20 session hosts.

You create a new scaling plan that has the Ramp-up settings shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

#### NOTE: Each correct selection is worth one point.

### **Question 4**

**Question Type:** MultipleChoice

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Virtual Desktop host pool that runs Windows 10 Enterprise multi-session.

User sessions are load-balanced between the session hosts. Idle session timeout is 30 minutes.

You plan to shut down a session host named Host1 to perform routine maintenance.

You need to prevent new user sessions to Host1 without disconnecting active user sessions.

Solution: From the host pool, you change the Drain mode of Host1.

Does this meet the goal?

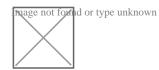

Options:			
A) Yes			
B) No			
Answer:			
A			
Explanation:			

https://docs.microsoft.com/en-us/azure/virtual-desktop/drain-mode

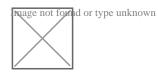

### **Question 5**

#### **Question Type:** Hotspot

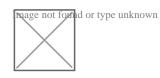

You have an Azure Virtual Desktop deployment that contains the session hosts shown in the following table.

You have the users shows in the following table.

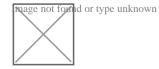

Users connect to Azure from the locations shown in the following table.
