Question 1

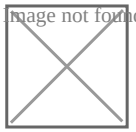
Question Type: Hotspot

You have an Azure Virtual Desktop host pool named HostPool1 that must support 60 sessions.

The session hosts for HostPool1 are configured as shown in the following exhibit.

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.



Question 2

Question Type: Hotspot

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile.

You need to perform the following configurations:

* Create a configuration file to list the excluded profile folders.

* Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Question 3

Question Type: OrderList

-

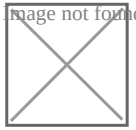
You have an Azure subscription that contains a virtual machine named VM1. VM1 runs a customized version of Windows 10 Enterprise.

You generalize the operating system on VM1 and shut down the virtual machine.

You need to deploy additional virtual machines based on an image of VM1 by using the Azure portal.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:



Answer:

Create an image definition gallery. Create

Question 4

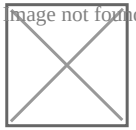
Question Type: Hotspot

-

You have an Azure subscription.

You plan to deploy an Azure Virtual Desktop solution that will contain Windows 10 multi-session hosts in a single host pool. The solution has the requirements shown in the following table.

Image not found or type unknown



You need to configure the session host for the host pool. The solution must minimize costs.

How many session hosts should the host pool contain, and how many vCPUs should each session host have? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Question 5

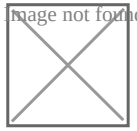
Question Type: **Hotspot**

-

You have an Azure subscription named Subscription1 that contains the users shown in the following table.

Subscription1 contains the Azure Virtual Desktop host pools shown in the following table.

Subscription1 contains the Azure Virtual Desktop application groups shown in the following table.

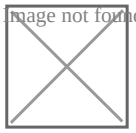


You perform the role assignments shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:



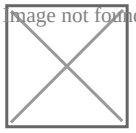
Question 6

Question Type: **Hotspot**

-

You have an Azure Virtual Desktop host pool named HostPool1 that contains 20 session hosts.

You create a new scaling plan that has the Ramp-up settings shown in the following exhibit.



Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer:

Question 7

Question Type: MultipleChoice

HOTSPOT

-

You have an Azure Virtual Desktop deployment that contains the session hosts shown in the following table.

You have the users shows in the following table.

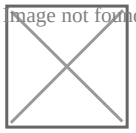
Users connect to Azure from the locations shown in the following table.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Options:

A) Explanation:



Answer:

A

Question 8

Question Type: **MultipleChoice**

HOTSPOT

-

You have an Azure Virtual Desktop host pool that contains 10 session hosts.

You plan to configure each session host to use an FSLogix profile container that will exclude specific folders in the user profile.

You need to perform the following configurations:

* Create a configuration file to list the excluded profile folders.

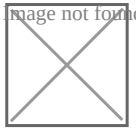
* Identify which registry setting will distribute the file to each session host automatically.

What should you name the configuration file, and which registry setting should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Options:

A) Explanation:



Answer:

A

Question 9

Question Type: MultipleChoice

HOTSPOT -

You have an Azure Virtual Desktop deployment that contains a host pool named Pool1. Pool1 contains two session hosts.

Pool1 is configured as shown in the following exhibit.

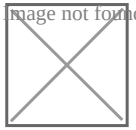
Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Options:

A) Explanation:

Image not found or type unknown



Answer:

A
