# Question 1

## Question Type: DragDrop

A company uses Dynamics 365 finance and operations apps. The company plans to integrate third-party products with Dynamics 365 Finance.

You need to select the appropriate data integration option for each scenario.

Which data integration option should you select? To answer, drag the appropriate data integration options to the correct scenarios. Each data integration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Data integration options	Answer Area								
<input type="text" value="Batch data API"/> <input type="text" value="Custom service"/>									
<input type="text" value="OData"/> <b>Answer:</b>									
	<table border="1"><thead><tr><th data-bbox="1361 788 1458 815">Scenario</th><th data-bbox="1879 788 2152 815">Data integration option</th></tr></thead><tbody><tr><td data-bbox="987 842 1771 935">Move asset status information from an on-premises application to Dynamics 365 Finance in near real time by using a publicly exposed data entity.</td><td data-bbox="1890 842 2152 884"><input type="text"/></td></tr><tr><td data-bbox="987 959 1760 1023">Provide information from Dynamics 365 Finance to a website to display item prices in near real time by using the SOAP protocol.</td><td data-bbox="1890 959 2152 1000"><input type="text"/></td></tr><tr><td data-bbox="987 1046 1738 1102">Import vendor invoices into Dynamics 365 Finance at the end of each business day.</td><td data-bbox="1890 1046 2152 1088"><input type="text"/></td></tr></tbody></table>	Scenario	Data integration option	Move asset status information from an on-premises application to Dynamics 365 Finance in near real time by using a publicly exposed data entity.	<input type="text"/>	Provide information from Dynamics 365 Finance to a website to display item prices in near real time by using the SOAP protocol.	<input type="text"/>	Import vendor invoices into Dynamics 365 Finance at the end of each business day.	<input type="text"/>
Scenario	Data integration option								
Move asset status information from an on-premises application to Dynamics 365 Finance in near real time by using a publicly exposed data entity.	<input type="text"/>								
Provide information from Dynamics 365 Finance to a website to display item prices in near real time by using the SOAP protocol.	<input type="text"/>								
Import vendor invoices into Dynamics 365 Finance at the end of each business day.	<input type="text"/>								

# Question 2

## Question Type: DragDrop

A company plans to implement Dynamics 365 Finance.

The company is unsure whether to use a cloud implementation or an on-premises implementation.

You need to determine the features that you can use for each implementation.

Which feature can you use? To answer, drag the appropriate features to the correct implementation types. Each feature may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Features	Answer Area								
Mobile app, workspaces, and platform	<table border="1"><thead><tr><th>Implementation type</th><th>Feature</th></tr></thead><tbody><tr><td>Cloud only</td><td></td></tr><tr><td>On-premises only</td><td></td></tr><tr><td>Both cloud and on-premises</td><td></td></tr></tbody></table>	Implementation type	Feature	Cloud only		On-premises only		Both cloud and on-premises	
Implementation type	Feature								
Cloud only									
On-premises only									
Both cloud and on-premises									
Save or load task recordings from the BPM library <b>Answer:</b>									
Integration with Power BI Desktop									

## Question 3

---

### Question Type: DragDrop

---

A company uses Dynamics 365 Finance.

You create two methods in a class:

\* MethodA is called only from the class. MethodA is not called from other locations in the code. Within MethodA, you must access class variables.

\* MethodB is called from other places in the app. MethodB does not need to instantiate the class or access the class variables.

You need to implement the methods.

Which method types should you use? To answer, drag the appropriate method types to the correct methods. Each method type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Method types**

- Private instance
- Public static
- Private static

**Answer:**

**Method**

- MethodA
- MethodB

**Method type**

- 
- 

## Question 4

---

**Question Type:** MultipleChoice

---

A developer submits code for a quality assurance review. Several lines of code use the var data type.

You need to validate the segments for the correct X++ structure.

Which code statement will pass validation?

**Options:**

---

**A-** var var1 = getDate (); var1 = var1 ? today(); "No today";

**B-** var var1 = true ? 10:"10"

**C-** var var1 = true; var1 = true ? 10:false;

**D-** var var1 = (var1 >= false) ? true :10;

**Answer:**

---

A

## Question 5

---

**Question Type: OrderList**

---

A company uses Dynamics 365 Finance.

You implement the unit test framework. You must automate the testing for previously developed functionality.

You need to create unit tests in Visual Studio.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions	Answer area
Add a Runnable class to the project.	1
Open Visual Studio as a non-administrator.	2
Add an extension to the project.	3
Open Visual Studio as an administrator.	4
Create a new project.	5
Add a new class to the project.	
Extend the SysTestCase class in the class declaration.	
Add methods to the class and decorate the methods with the [SysTestMethod] attribute.	

## Answer:

Extend the SysTest Case class in the class declaration with the (SysTestMethod) attribute.

## Question 6

### Question Type: MultipleChoice

You develop apps for Dynamics 365 Supply Chain Management.

You need to track changes only for sales header information by using data entities.

Which change tracking option should you use?

## Options:

- A- Enable primary table
- B- Disable change tracking
- C- Enable entire entity
- D- Enable custom query

**Answer:**

---

D
