# Question 1

---

**Question Type:** MultipleChoice

---

company is implementing Dynamics 365 Finance.

The company uses Microsoft 365 apps.

The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance. You need to identify the underlying technology that is required.

Solution: Lifecycle Services (ICS)

Does the solution meet the goal?

## Options:

---

A- Yes

B- No

## Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

A company is implementing Dynamics 365 Finance. The company uses Microsoft 365 apps.

The company wants to integrate Microsoft Word and Excel into Dynamics 365 Finance.

You need to identify the underlying technology that is required.

Solution: Azure DevOps

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

## Question 3

---

### Question Type: MultipleChoice

---

A company is implementing Dynamics 365 Finance.

The company needs information on the capabilities of Lifecycle Services (LCS).

You need to identify the scenarios for using LCS.

Which three scenarios should you identify? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

### Options:

---

- A-** View the implementation methodology examples provided by Microsoft.
- B-** Submit a support ticket.
- C-** Estimate the number of licenses required.
- D-** Configure database logging on tables.
- E-** Identify issues in module configuration and business data.

### Answer:

---

A, C, E

## Question 4

---

**Question Type:** MultipleChoice

---

A company is deploying a Microsoft Power Platform solution.

You need to grant access to the solution based on the following requirements:

- \* Users must be able to customize the environment.
- \* Users must be able to view rows only for the tables they create.

Which role should you assign?

### Options:

---

- A-** System Customizer
- B-** Common Data Service User
- C-** Environment Maker
- D-** System Administrator

## Answer:

---

A

## Explanation:

---

The System Customizer:

Has full permission to customize the system.

Can only view rows for system tables that they create.

<https://docs.microsoft.com/en-us/power-platform/admin/environments-overview>

## Question 5

---

### Question Type: DragDrop

---

A company plans to implement Dynamics 365 Supply Chain Management.

You are a solution architect and need to prepare a Solution Blueprint document for this implementation.

You need to classify the requirements by type.

What is the classification for each requirement? To answer, drag the appropriate classifications to the correct requirements. Each classification may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Classifications	Answer Area	Requirement	Classification
Functional		Evaluate system performance.	Classification
Non-functional		Convert a quote to a sales order.	Classification
		Update an environment.	Classification

**Answer:**

---

**Explanation:**

<https://docs.microsoft.com/en-us/learn/modules/work-with-requirements/4-non-functional-requirements>

## Question 6

---

**Question Type:** MultipleChoice

---

A company with multiple legal entities implements Dynamics 365 Finance.

You need to recommend options to ensure that you can provide customized financial reporting across the legal entities.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

**Options:**

---

- A- Create separate departments to manage functional areas.
- B- Create separate business units.
- C- Create separate cost centers to manage operations.
- D- Create separate value streams for item management.

**Answer:**

---

B, C

**Explanation:**

---

Operating units

An operating unit is an organization that is used to divide the control of economic resources and operational processes in a business. People in an operating unit have a duty to maximize the use of scarce resources, improve processes, and account for their performance.

The operating units in finance and operations apps are:

(B) Business unit - A semi-autonomous operating unit that is created to meet strategic business objectives. It is used for financial reporting that is based on industries or product lines that the organization serves independently of legal entities.

(C) Cost center - An operating unit in which managers are accountable for budgeted and actual expenditures. It is used for the management and operational control of business processes that span legal entities.

## Question 7

---

### Question Type: Hotspot

---

A company implements Dynamics 365 Finance.

A sales order confirmation report does not meet the company's branding standards. The report must include header notes and a colorful logo.

You must enable modern design for additional reports created by users in the future.

You need to meet the branding standards and enable additional forms and reports to be created by users.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

## Requirement

## Solution

Add colorful logo and header notes.

**Answer:**

**Explanation:**

Modern reports branding details

Print management configuration

Business document management

<https://learn.microsoft.com/en-us/dynamics365/fin-ops-core/dev-itpro/analytics/er-business-document-management>

Enable forms by users.

Modern reports branding details

SQL Server Reporting Services (SSRS) report design

Print management configuration

Business document management

## Question 8

**Question Type:** MultipleChoice

A company implements Dynamics 365 Finance.

Forms and reports take longer than usual to open and run in the production environment.

You need to investigate the performance issue by using SQL Insights in Lifecycle Services (LCS).

Solution: Get table fragmentation details and index rebuild suggestions.

Does the solution meet the goal?

### Options:

---

A- Yes

B- No

### Answer:

---

B

### Explanation:

---

Instead check for blocked queries and high DTU.

## Question 9

---

### Question Type: Hotspot

---

A company uses Dynamics 365 Supply Chain Management.

You are performing regression testing using the Regression suite automation tool (RSAT). You observe that invoice totals for some sales orders are lower than expected.

You need to ensure that the invoice totals are correct.

What should you do? To answer, drag the appropriate actions to the correct scenarios. Each action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer Area**

Requirement	Functionality
Track maintenance on mining machines and equipment.	<ul style="list-style-type: none"><li>Asset Management</li><li>Asset Management</li><li>Fixed Assets</li><li>Field Service</li></ul>
Capture costs for each of the mine locations for capitalization opportunities.	<ul style="list-style-type: none"><li>Fixed Assets</li><li>Project Management and Accounting</li><li>Fixed Assets</li><li>Inventory dimension site</li></ul>

**Answer:**

## Question 10

**Question Type:** MultipleChoice

You are a solution architect for a company that uses Dynamics 365 finance and operations apps. The company does not have a centralized reporting strategy. You create a solution design document. The out-of-the-box reports and workspaces do not meet the company's reporting needs. The company needs to use available Power BI dashboards to report against Dynamics 36S dat

a. You need to recommend a data source to use for the Power BI reports-What should you recommend?

**Options:**

**A-** Azure Data Lake database

**B-** Microsoft Dataverse

**C-** Transactional database

**D-** Entity store database

**E-** Bring your own database (BYOD)

**Answer:**

---

A
