Question 1

Question Type: MultipleChoice

You are deploying Teams Rooms to a Windows device.

You need to prevent meeting attendees from using room remote in the Teams mobile app.

What should you configure in the Microsoft Teams admin center?

Options:

- A- Supported meeting mode
- B- Coordinated Meetings
- C- Front row experience
- D- Bluetooth beaconing

Answer:

D

Explanation:

Manage a Microsoft Teams Rooms console settings remotely with an XML configuration file

This article discusses remote management of the default settings used by a Microsoft Teams Rooms device. It discusses how to create a master settings file and links to discussions of how to place them as needed on Teams Rooms.

It is possible for you to change default settings of Teams Rooms by updating a master XML file and sending copies to the remote Teams Rooms devices.

Create an XML configuration file

Any text editor can be used to create a settings file. The XML Elements table explains the elements shown in this sample SkypeSettings.xml (required file name) configuration file.

```
<SkypeSettings>
```

```
<AutoScreenShare>1</AutoScreenShare>
```

```
<HideMeetingName>1</HideMeetingName>
```

```
<AutoExitMeetingEnabled>>true</AutoExitMeetingEnabled>
```

```
<AudioRenderDefaultDeviceVolume>70</AudioRenderDefaultDeviceVolume>
```

* Details omitted*

```
<AllowRoomRemoteEnabled>>true</AllowRoomRemoteEnabled>
```

Incorrect:

Not B: If you have one or more Microsoft Teams Rooms on Windows devices or Surface Hubs in a meeting room, you can set up Coordinated Meetings. Coordinated Meetings lets you set up your Teams Rooms on Windows devices and Surface Hubs so that when you join a meeting on one device, the other devices in the room are also joined to the same meeting. You can configure your cameras, speakers, and microphones so that the ones that give participants the best experience are enabled while others are disabled. This avoids the dreaded echo and feedback noise participants can experience when adding multiple devices to a meeting.

Not C: Front Row layout in Teams Rooms-- Additional functionality with the Front Row experience, a layout for hybrid meetings that enables users to see remote attendees at eye level and on dual screens. Users can see Chat in the right panel and participants with raised hands on the left panel. And, Meeting Chat is added in the Gallery, Large Gallery, and Together Mode layouts.

Question 2

Question Type: MultipleChoice

You have a Teams Phone deployment.

You are designing a meeting space that contains a Teams certified conference phone.

You need to configure the phone to meet the following requirements:

Show the calendar on the display by default

Support one-touch join for Teams meetings

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

Options:

- A- Create and assign a Teams IP phone policy
- B- Assign a Microsoft Teams Rooms Pro license to the phone
- C- Assign a Shared Device license to the phone
- D- Create and assign an Audio Conferencing policy
- E- Enable the Cloud Video Interop for Teams service

Answer:

B, D

Explanation:

B: Teams Rooms license service plan comparison

The following table shows the services included in each Teams Rooms license.

	Microsoft Teams Rooms Basic	Microsoft Teams Rooms Pro
Maximum number of licenses	25	Unlimited
Microsoft Teams	✓	✓
Audio Conferencing¹	✓	✓
Whiteboard	✓	✓
Teams Phone		✓
Microsoft Intune²		✓
Azure Active Directory Premium Plan 1		✓
Skype for Business Plan 2³		✓

Note: Microsoft Teams Rooms licenses

Microsoft offers two licenses for Teams Rooms systems that participate in Teams meetings and calls:

Microsoft Teams Rooms Pro delivers enhanced in-room meeting experiences like intelligent audio and video, front row and large galleries, and dual screen support. The Teams Rooms Pro license also provides advanced management features like remote device management, conditional access policies, and detailed device analytics.

Teams Rooms Pro is a great fit for medium and enterprise organizations, as well as smaller organizations with larger room counts or more advanced needs. Teams Rooms Pro licenses can be used to license both certified Teams Rooms systems and Teams Panels.

Microsoft Teams Rooms Basic provides core meeting experiences to organizations that purchase a certified Microsoft Teams Rooms system, at no additional cost. The Teams Rooms Basic license includes scheduling, joining meetings, content sharing, and collaborative white boarding, as well as basic security and management capabilities out-of-the-box.

Incorrect:

Not C:

Microsoft Teams Shared Devices licenses aren't supported on and won't work with Teams Rooms devices. Teams Rooms devices should only be assigned Teams Rooms Basic or Teams Rooms Pro licenses.

Not E: Cloud Video Interop (CVI) is a Microsoft Qualified third-party solution that enables third-party meeting rooms (telepresence) and personal video devices (VTCs) to join Microsoft Teams meetings.

With Microsoft Teams, you get rich online content collaboration in meetings that include audio, video, and content sharing.

Question 3

Question Type: MultipleChoice

You have a Microsoft Teams Phone deployment.

You have Teams devices located in meeting rooms and public areas.

You need to turn on Device lock for the devices.

What should you configure?

Options:

A- a calling policy

B- a setup policy

C- a Teams policy

D- a configuration profile

Answer:

D

Explanation:

Microsoft Teams Physical Device Management

NOTE: As at June 2020, there are no options to configure the Device Configuration Profiles by API or PowerShell.

There are a number of Microsoft Teams certified devices on the market from several different manufactures.

These devices are listed on the Microsoft Teams Devices Page.

Once a device is logged in and the user setup, the device is registered to the tenant and a policy applied against it from the Configuration Profiles listed in the Microsoft Teams Admin Portal.

These Configuration Profiles allow you to set options like the devices:

Timeout and lock status

Language

Timezone

Time format

Screen saver

Network settings; and

To enable or disable the second PC port

If the Microsoft 365 tenant also has Intune setup, then the device is registered to Intune and any compliance policies are applied when the first user logs in.

Different Configuration Profiles can be used to setup phones with common attributes

Question 4

Question Type: OrderList

Your company plans to use Microsoft Teams for collaboration and communication.

You need to deploy Microsoft Surface Hub devices to Teams meeting rooms.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Deploy the provisioning package to Surface Hub

Install Windows Configuration Designer

Run the `Enable-CsMeetingRoom` cmdlet

Install the Windows Installation Assistant

Use the Provision Surface Hub devices wizard

Configure a Teams update policy

Save the provisioning package to a USB device

Four empty rectangular boxes with red borders, stacked vertically, likely representing a list of options or a selection interface.

Answer:

Use the Provisioning Configuration Designer wizard

Save t

Explanation:

Question 5

Question Type: MultipleChoice

You have a Microsoft Teams Phone deployment.

You implement Teams Rooms on Windows.

You need to apply a custom theme to the display of Teams Rooms on Windows.

What should you configure?

Options:

A- a configuration profile

- B-** a SkvDeSettinias.xml file
- C-** a team template
- D-** a LayoutModification.xml file

Answer:

C

Explanation:

Custom background template

To create custom backgrounds that meet the guidelines in the previous sections, you can download the Microsoft Teams Rooms Theme Template.

The template is a .PSD file that can be opened by apps such as Adobe Photoshop or Paint.NET (a plug-in may be required). The template provides assets and guidelines to help you place text and graphics in your custom backgrounds that won't be obscured by on-screen elements.

<https://learn.microsoft.com/en-us/microsoftteams/rooms/custom-backgrounds>

Question 6

Question Type: Hotspot

Your company has a Teams Phone deployment.

The network team at the company completes a local internet breakout for Teams traffic.

To validate the configuration, you review the Call Debug log shown in the following exhibit.

Connectivity_TransportBytesSent	3324
Connectivity_TransportMode	2
Connectivity_TransportPktsReceived	18
Connectivity_TransportPktsSent	20
Connectivity_BaseAddress	192.168.1.216:50008
Connectivity_LocalAddress	192.168.1.216:50011
Connectivity_LocalSite	120.17.163.212:1883
Connectivity_RemoteAddress	52.113.88.214:49704
Connectivity_RemoteSite	52.113.88.214:49704
IsRetargeted	0

Use the drop down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Answer Area

The WAN IP address for the call source is **[answer choice]**.

	▼
52.113.88.214	
120.17.163.212	
192.168.1.216	

The WAN port for call destinations is **[answer choice]**.

	▼
1883	
49704	
50008	
50011
