# Question 1

---

## Question Type: MultipleChoice

---

You are building a Power Pages site for a supermarket chain.

The company plans to have the managers of individual stores use the site. Managers will authenticate on the site each week by using their corporate identity to update stock information for their store. Managers must be able to add and update stock information for their store only.

You need to configure the site security.

Solution: Use Microsoft Entra ID authentication.

Does the solution meet the goal?

### Options:

---

A- Yes

B- No

### Answer:

---

B

## Question 2

---

**Question Type:** MultipleChoice

---

You are building a Power Pages site for a supermarket chain.

The company plans to have the managers of individual stores use the site. Managers will authenticate on the site each week by using their corporate identity to update stock information for their store. Managers must be able to add and update stock information for their store only.

You need to configure the site security.

Solution: Use local authentication.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

## Question 3

---

**Question Type:** MultipleChoice

---

You are building a Power Pages site for a supermarket chain.

The company plans to have the managers of individual stores use the site. Managers will authenticate on the site each week by using their corporate identity to update stock information for their store. Managers must be able to add and update stock information for their store only.

You need to configure the site security.

Solution: Configure table permissions.

Does the solution meet the goal?

**Options:**

---

**A-** Yes

**B-** No

**Answer:**

---

B

## Question 4

### Question Type: DragDrop

You are creating Power Automate automations targeting Dataverse.

The automations must meet the following requirements:

- \* Run a custom API created by a developer. The API performs an action against an existing Account row in the system.
- \* Create three rows in Dataverse. If an error occurs when you create the second row, the first row must be deleted.
- \* Run several create, update, and delete operations as part of a single transaction without writing custom code.
- \* Run several complex operations targeting multiple rows in the system as part of a single transaction.

You need to configure the actions.

Which actions should you configure? To answer, move the appropriate actions to the correct requirements. You may use each action once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

Actions	Dataverse connector requirements	Action
<input type="checkbox"/> Add a new row.	Requirement	
<input type="checkbox"/> Perform a bound action.	Perform an action targeting an Account row.	<input type="text"/>
<input type="checkbox"/> Perform an unbound action.	Create three new rows.	<input type="text"/>
<input type="checkbox"/> Perform a changeset request.	Execute create, delete, and update operations.	<input type="text"/>
	Execute complex operations.	<input type="text"/>

**Answer:**

## Question 5

---

**Question Type:** MultipleChoice

---

A cloud flow you authored failed several times in production due to a transient network issue. The issue is now resolved. You need to reprocess the failed flow runs with the least amount of administrative effort. What should you do?

### Options:

---

- A- Resubmit each run individually.
- B- Resubmit all runs in bulk.
- C- Rerun the trigger action.
- D- Turn the flow off and then on.

### Answer:

---

B

## Question 6

---

**Question Type:** MultipleChoice

---

A company is evaluating the capabilities in Dataverse and the scenarios for using virtual tables. You need to identify the capabilities of virtual tables. What is a capability of virtual tables?

**Options:**

---

- A-** Virtual tables contain time dimension attributes by default.
- B-** Virtual tables store data in the Dataverse environment.
- C-** Virtual tables require configuration of a data provider.
- D-** Virtual tables can be configured for user and team ownership.

**Answer:**

---

C

## Question 7

---

**Question Type: DragDrop**

---

A company uses Power Apps.

You create a custom table and configure a child table relationship with the contact table.

You need to configure the cascading rules for each action.

Which behavior should you use? To answer, drag the appropriate behaviors to the correct actions. Each behavior may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Behaviors	Answer Area
Restrict	<b>Action</b>
Cascade All	Custom table record is deleted.
Cascade None	Custom table record is shared.
