Question 1

Question Type: MultipleChoice

You develop and deploy a Power Apps solution.

The following changes must be made to the solution:

- * Delete a column of data.
- * Modify several views.
- * Add several charts to dashboards.

You need to re-deploy the app. What should you do?

Options:

- A-** Update the solution.
- B-** Upgrade the solution.
- C-** Create a new solution.
- D-** Patch the solution.

Answer:

A

Question 2

Question Type: MultipleChoice

You are configuring a Microsoft Power Virtual Agents chatbot to use the authenticate option for Microsoft Teams only.

You need to select the variables that will return information about the logged in user.

Which two variables should you use?

Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

Options:

A- AuthToken

B- UserDisplayName

C- UserID

D- IsLoggedIn

Answer:

A, D

Question 3

Question Type: DragDrop

A company is configuring Microsoft Power Virtual Agents and Power Automate flows that use model-driven apps. The company has a website that uses Power Pages. You create Power Virtual Agents bot topics. You must configure the following:

- * Use a bot on the website.
- * Create Bot Framework skills.
- * Create a support request from the bot without human interaction.

You need to configure the website.

Which applications should you configure?

To answer, drag the appropriate applications to the correct requirements. Each application may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Applications	Answer Area	Requirement	Application
Power Virtual Agents		Use a bot on the website.	
Power Pages		Create Bot Framework skills.	
Power Automate		Create support request from the bot.	
Power App			

Question 4

Question Type: Hotspot

The following code updates the customer size code choice column on the Account table if the number of employees column value is greater than 100. Line numbering is provided for information only.

```
01 static void UpdateAccount(CrmServiceClient svc, string accountId)
02 {
```

Answer Area

Answer:

Statement

Does the Retrieve method use the correct parameters?

Yes

No

Will a plug-in triggered on the update of the numberofemployees column execute after the Update method is executed?

Will an exception be thrown if the value for numberofemployees is null?

Question 5

Question Type: OrderList

You are creating an app that connects to Microsoft Dataverse on a nightly basis. You plan to integrate the app with an external system.

The application must not authenticate by using a Microsoft Azure Active Directory (Azure AD) user account.

You need to enable the application to authenticate to Dataverse.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Use the Azure AD application id and secret as credentials in the application.

Grant the Dataverse application user the Access Dynamics 365 as organization users permission in Azure AD.

Register the application in Azure AD with appropriate permissions.

Use the Dataverse application user username and password as credentials in the application.

Create the application user in Dataverse using the Application User form.

Assign a security role to the application user in Dataverse.

Answer:

Assign the app user to the role in Dataverse using the Application User form.
Register the application in Azure AD with appropriate permissions.
Use the Dataverse application user username and password as credentials in the application.
Assign a security role to the application user in Dataverse.

Question 6

Question Type: DragDrop

You have several model-driven apps.

You must ensure that app creators and system administrators can customize the apps. You must follow the principle of least privilege.

You need to assign the permissions that are needed for app creators and system administrators.

Which security roles should you assign? To answer, drag the appropriate roles to the correct requirements. Each role may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point

Roles	Requirement	Role
Answer: System Administrator only	Create customizations in the system	
System Customizer only	View all system data entities	
	View all data stored in system entities	

Question 7

Question Type: OrderList

You are developing a Power Platform solution. You are modifying a business process flow. You have created a new radial knob for the Total amount value and have added the radial knob to the form.

The Total amount value must be entered at initiation before moving to the next step.

You need to configure the business process flow.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Actions

Create a new solution and add the business process flow and export the solution. Delete the solution after export.

Open the business process in the Business Process Flow designer and select Activate/Update.

Add another step to the business process flow.

Import the solution into Dataverse.

Delete the business process flow.

Copy custom control configurations to the business process flow FormXML for the

Answer Area

Answer:

Copy the connection string from the Business Process Flow design tool and use it to delete data from after export.

Question 8

Question Type: MultipleChoice

You need to connect to the background check API.

Which mechanism should you use?

Options:

- A- JavaScript
- B- Flow with a custom connector
- C- Azure Function
- D- Plug-in

Answer:

C

Question 9

Question Type: Hotspot

You need to configure the address verification API.

Which values should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Property
Answer:

Value

Address validation message

	▼
Update	
Execute	
northwind_ValidateAddress	

Execution mode

	▼
Synchronous	
Asynchronous	
Post-Operation
